Cochlear Implants Jace Wolfe, 2018-12-14 Cochlear Implants Audiologic Management and Considerations for Implantable Hearing Devices provides comprehensive coverage of the audiological principles and practices pertaining to cochlear implants and other implantable hearing technologies This is the first and only book that is written specifically for audiologists and that exhaustively addresses the details involved with the assessment and management of cochlear implant technology Additionally this book provides a through overview of hybrid cochlear implants implantable bone conduction hearing technology middle ear implantable devices and auditory brainstem implants Key Features Each chapter features an abundance of figures supporting the clinical practices and principles discussed in the text and enabling students and clinicians to more easily understand and apply the material to clinical practice The information is evidence based and whenever possible is supported by up to date peer reviewed research Provides comprehensive coverage of complex

information and sophisticated technology in a manner that is student friendly and in an easily understandable narrative form Concepts covered in the narrative text are presented clearly and then reinforced through additional learning aids including case studies and video examples Full color design with numerous figures and illustrations Cochlear Implants is the perfect choice for graduate level courses covering implantable hearing technologies because the book provides a widespread yet intricate description of every implantable hearing technology available for clinical use today This textbook is an invaluable resource and reference for both audiology graduate students and clinical audiologists who work with implantable hearing devices Furthermore this book supplements the evidence based clinical information provided for a variety of implantable hearing devices with clinical videos demonstrating basic management procedures and practices

Auditory Prostheses Fan-Gang Zeng, Arthur N. Popper, Richard R. Fay, 2011-09-15 Cochlear implants are currently the standard treatment for profound sensorineural hearing loss In the last decade advances in auditory science and technology have not only greatly expanded the utility of electric stimulation to other parts of the auditory nervous system in addition to the cochlea but have also demonstrated drastic changes in the brain in responses to electric stimulation including changes in language development and music perception Volume 20 of SHAR focused on basic science and technology underlying the cochlear implant However due to the newness of the ideas and technology the volume did not cover any emerging applications such as bilateral cochlear implants combined acoustic electric stimulation and other types of auditory prostheses nor did it review brain plasticity in responses to electric stimulation and its perceptual and language consequences This proposed volume takes off from Volume 20 and expands the examination of implants into new and highly exciting areas This edited book starts with an overview and introduction by Dr Fan Gang Zeng Chapters 2-9 cover technological development and the advances in treating the full spectrum of ear disorders in the last ten years Chapters 10-15 discuss brain responses to electric stimulation and their perceptual impact This volume is particularly exciting because there have been quantum leap from the traditional technology discussed in Volume 20 Thus this volume is timely and will be of real importance to the SHAR audience

Cultural Sensitivity and Responsiveness in Neurorehabilitation Gloria Jean L. Wallace, 2024-12-02 *Cultural Sensitivity and Responsiveness in Neurorehabilitation: A Personalized Approach for Speech Language Pathologists* is a groundbreaking and transformative resource for designing quality and equitable neurorehabilitation care for individuals from diverse communities. Material coverage is comprehensive and chapters are user friendly for speech language pathologists, SLPs, and SLP students alike. Case presentations are provided to demonstrate best practices. As our world becomes increasingly more diverse, it is imperative for SLPs to be knowledgeable about and experienced with foundational information relating to diversity, equity, inclusion, implicit bias, intersectionality, and SLP best practices for cases from culturally and linguistically diverse communities. The text culminates with an insightful epilogue featuring people from diverse communities from around the world who have neurogenic communication, cognitive, and swallowing disorders and who share information about what they would like neurorehabilitation specialists to know. The book is organized into seven sections. Part I, *Introduction to Personalized Care*, sets the stage by introducing the concept of multicultural neurogenetics and personalized care. Chapters delve into topics like implicit bias, interprofessional collaboration, and the tools clinicians need for effective case management when working with diverse populations. Part II, *Building a Foundation for Neurorehabilitation*, in a

Multicultural World Personalization Personified provides practical guidance for SLPs. It covers the preparation for case contact working with interpreters and translators and the assessment and management of speech language cognitive and swallowing issues in culturally and linguistically diverse populations. Part III Specialty Neurogenetics Chapters offers in depth knowledge on various neurogenic conditions such as aphasia traumatic brain injury right hemisphere brain damage the dementias dysarthrias and dysphagia within a cultural context. Part IV A Sampling of Information About U S Census Bureau Racial Ethnic Groups delves into the unique cultural and communication factors related to various racial and ethnic groups in the United States including Blacks Hispanics Chinese and Asian Americans American Indians and Alaska Natives and White Americans. Part V Intersectionality examines the intersection of factors that create unique challenges in care including ethical perspectives for serving LGBTQIA individuals trauma informed care for marginalized populations and the cultural aspects of care for the Deaf community. Part VI Contributions from Educators and a Look at Neurorehabilitation Care Trends within the U S provides insights from academics on diversity equity and inclusion in education designing courses that promote DEI and current trends in SLP neurorehabilitation. Part VII presents real world cases with accompanying videos illustrating best practices in SLP neurorehabilitation care for diverse communities. These cases cover a wide range of scenarios from collaboration between medical SLPs and interpreters to culturally adapted therapy for older adults and complex management considerations for stroke survivors from the Deaf community. This section ends with a chapter by visionaries from Asia Africa Europe Oceania South America and North America sharing their insights on bridging the international diversity sensitivity and responsiveness gap emphasizing the importance of cultural competence in a global context. Key Features Comprised of 40 chapters by 80 renowned authors and over 100 total contributors from diverse communities including experienced SLP clinicians academicians and researchers diversity equity and inclusion DEI specialists and professionals from the areas of audiology medicine psychology and education. Includes real world case studies including accompanying videos to illustrate best practices in SLP neurorehabilitation care for people from diverse communities. Discusses diversity matters for people with major neurologically based communication cognitive and swallowing disorders and by race ethnicity and culture with attention to intersectionality. Features content designed specifically for this book including considerations for individuals with neurogenic disorders who are from the Deaf community trauma informed care for the unsheltered and people who have experienced interpartner violence as well as intersectionality issues. Incorporates perspectives about the value of non traditional approaches to supplement SLP treatment health literacy and public health partnerships. Provides information by international SLPs about DEI issues that matter most in their respective countries and features thoughts about future neurorehabilitation directions. Includes interviews with people who have neurogenic communication cognitive and swallowing disorders from culturally and linguistically diverse communities in the United States and abroad providing insights into what matters most and how to best achieve personalization of
