

The background of the image is a photograph of a mountain range at sunset or sunrise. The sky is filled with orange and yellow clouds, and the sun is visible on the left side. The mountains are dark and silhouetted against the bright sky.

Believe in what is real, what only time
can reveal. Believe in impossible
possibilities to break what should not
exist; fight on, and continue to resist.

Impossible Possibilities

Harris B. Bechtol

Impossible Possibilities:

Freedom's Embrace J. Melvin Woody, 2010-11-01 To be free is to escape all limitations and obstacles or so we think at first But if we probe further we discover that freedom embraces its own necessities a set of conditions without which it could not exist Freedom's Embrace explores these necessities of freedom J Melvin Woody surveys competing conceptions of freedom and traces debates about the nature and reality of freedom to confusions about knowledge humanity and nature that are rooted in some of the most fundamental assumptions of modern Western thought The preemption of freedom as an exclusively human privilege with all nature relegated to mechanical necessity is a fatal error that renders both humanity and nature equally unintelligible What distinguishes human beings from other animals is not freedom but the use of symbols which vastly extends the range of available options and enables us to envision freedom as an ideal by which customary institutions and norms may be judged and transformed By carefully surveying its necessary conditions and limitations Woody reconciles the salient competing conceptions of freedom and weaves them together into a richer and broader theory that resolves old controversies and opens the way toward an ethics of freedom that can meet the challenges of relativism and nihilism that arise from recognizing the historicity and malleability of culture

Transcripts of the Sacred in Nigeria

Nimi Wariboko, 2023-06-20 Transcripts of the Sacred in Nigeria explores how the sacred plays itself out in contemporary Africa It offers a creative analysis of the logics and dynamics of the sacred understood as the constellation of im possibility available to a given community in religion politics epistemology economic development and reactionary violence Using the tools of philosophy postcolonial criticism political theory African studies religious studies and cultural studies Wariboko reveals the intricate connections between the sacred and the existential conditions that characterize disorder terror trauma despair and hope in the postcolonial Africa The sacred Wariboko argues is not about religion or divinity but the set of possibilities opened to a people or denied them the sum total of possibilities conceivable given their level of social technological and economic development These possibilities profoundly speak to the present political moment in sub Saharan Africa

A Death of the World Harris B. Bechtol, 2025-04-01 A Death of the World offers a phenomenological description of what happens to the world for those who survive the death of someone Bringing Jacques Derrida's works into conversation with the philosophies of Martin Heidegger Emmanuel Levinas Jean Luc Marion Maurice Blanchot and Claude Romano the poetry and literature of Paul Celan W H Auden Emily Dickinson Ovid and Jonathan Safran Foer and psychological works concerning trauma mourning epigenetics and memory author Harris B Bechtol provides interdisciplinary language for understanding the death of the other as an event He argues that such death must be understood as an event because this death is more than just the loss of the other who has died insofar as the meaning of the world to and with this other is also lost Such loss manifests itself through the transformations of both the spaces in which meaning takes place and the lived time of a survivor's world These transformations of the world culminate in his account of workless mourning which

establishes the contours of the life after these deaths of the world **Lutherrenaissance Past and Present** Christine Helmer, Bo Kristian Holm, 2015-06-17 This volume makes a distinctive contribution to the upcoming 500th anniversary of Luther's reformation by looking back to the previous centennial in 1917 and tracing forward the enduring impact of the questions raised by Lutheran scholars then to contemporary research in religious studies history and theology The great flourishing of interest in Luther's religious experience and thought in Berlin at the turn of the twentieth century was known as the Lutherrenaissance an extraordinarily generative moment of scholarly creativity within the Lutheran tradition Thinkers such as Holl Harnack and Otto took up questions that would reverberate throughout twentieth century religious and theological inquiry on the nature of history for instance dialectical theology and the question of mysticism in religious experience The Lutherrenaissance also planted the seeds of a political theology that contributed to the alliance of Lutheran theologians with National Socialism Contributors to this volume attentive to both to the rich contributions of the Lutherrenaissance and its darker consequences open an unprecedented conversation across the century Then and now the study of religion and theology were in periods of transition then and now scholars were working at the very foundations of the various disciplines of religious inquiry across the social sciences and humanities Contributors aim to bring the critical insights of that period to bear on key questions in the study of religion and theology today with particular attention to the global context within which present day scholars work It exemplifies new perspectives in Luther scholarship today the rich and fertile grounds of the Lutheran tradition in its engagement with unprecedented global circumstances **There Is More** Brian Houston, 2018-03-20 Founder and Global Senior Pastor of Hillsong Church and author of LIVE LOVE LEAD shows how with God's power you can believe and achieve a life that exceeds every earthly expectation When you surrender control and follow God's guidance you become empowered and equipped to do the impossible reach higher and go further than you could have ever imagined giving Him all the glory By building our lives around godly principles surrounding ourselves with wisdom and living for a cause greater than ourselves we can effectively live out God's purposes and have an enduring impact As Brian Houston has personally discovered when we depend on Jesus as the source for our identity our lives can be a lasting legacy that maximize the gifts He has given each of us as unique individuals There is More is for anyone who wants to be challenged to live with expectancy Ephesians 3 is a call to release the immeasurable potential within you and the exceeding abundant and above plans and purposes of a Holy God that are beyond your greatest imagination Now to Him who is able to do exceedingly abundantly above all that we ask or think according to the power that works in us to Him be glory in the church by Christ Jesus to all generations forever and ever Amen Ephesians 3 20 21 **Anarchism and Ecological Economics** Ove Daniel Jakobsen, 2018-12-07 Anarchism and Ecological Economics A Transformative Approach to a Sustainable Future explores the idea that anarchism aimed at creating a society where there is as much freedom in solidarity as possible may provide an ideal political basis for the goals of ecological economics It seems clear that it is going to be impossible to solve

the problems connected to environmental degradation climate change economic crashes and increasing inequality within the existing paradigm The anarchist aims of reducing the disparities of rank and income in society and obtaining a high standard of living within environmentally sound ecosystems chime well with the ecological economists goal of living within our environmental limits for the betterment of the planet and society The book refers to the UN s sustainability development goals and the goals expressed in the Earth Charter viewing them through an anarchist s lens It argues that in order to establish ecological economics as a radical new economy right for the 21st century neoliberal economics needs to be replaced By connecting ecological economics to a solid philosophical tradition such as anarchism it will be easier for ecological economics to become a far more potent alternative to green economic thinking which is based on and supports the dominant political regime Innovative and challenging this book will appeal to students and scholars interested in economics and the politics surrounding it *Impossible Possibilities* Louis Pauwels, Jacques Bergier, 1974

Knowledge Through Imagination Amy Kind, Peter Kung, 2016 Imagination is celebrated as our vehicle for escape from the mundane here and now It transports us to distant lands of magic and make believe It provides us with diversions during boring meetings or long bus rides It enables creation of new things that the world has never seen Yet the focus on imagination as a means of escape from the real world minimizes the fact that imagination seems also to furnish us with knowledge about it Imagination seems an essential component in our endeavor to learn about the world in which we live whether we re planning for the future aiming to understand other people or figuring out whether two puzzle pieces fit together But how can the same mental power that allows us to escape the world as it currently is also inform us about the world as it currently is The ten original essays in *Knowledge Through Imagination* along with a substantial introduction by the editors grapple with this neglected question in doing so they present a diverse array of positions ranging from cautious optimism to deep seated pessimism Many of the essays proceed by considering specific domains of inquiry where imagination is often employed from the navigation of our immediate environment to the prediction of our own and other peoples behavior to the investigation of ethical truth Other essays assess the prospects for knowledge through imagination from a more general perspective looking at issues of cognitive architecture and basic rationality Blending perspectives from philosophy of mind cognitive science epistemology aesthetics and ethics *Knowledge Through Imagination* sheds new light on the epistemic role of imagination **Translations on International Communist Developments**, 1965

Hard Enough Already: Following Jesus in the 21st Century Johnny White, 2021-04-20 Jesus Sermon on the Mount is the most familiar sermon in the world Jesus of Nazareth spoke it over 2000 years ago The Sermon on the Mount provides insight into the authentic Jesus of the bible Jesus did not come to make things more complicated than they already are by limiting salvation to only a few Instead he upheld impossible possibilities that point to the undeniable grace of God for the many Have you ever asked yourself Who was Jesus Is the Bible true Or how do we know the bible is true Then Johnny White s *Hard Enough Already Following Jesus in the 21st Century* could be a good

Christian book to explore It will help you answer What did Jesus say in the Sermon on the Mount Jesus Sermon on the Mount is still a critically important message for followers of Jesus in the 21st century This brief Christian book addresses every word and topic of the Sermon on the Mount Jesus is drawing the watching world to remarkable teachable moments about being salt and light citizens in the Kingdom of God on earth as it is in heaven He also unpacks what the authentic Jesus looks like to those who want to follow him Jesus pointed to a life more abundant than retribution revenge and violence He told of the Third Way of mercy forgiveness and grace that refuses violence yet never fails to confront evil The author helps people understand who Jesus is today and how to trust in him even amid a crisis of belief What could be more apropos for a contentious uncivil time such as this No matter what happens next

The Inexhaustible God Royce G. Gruenler, 2020-04-07

Mega-Urbanization in the Global South Ayona Datta, Abdul Shaban, 2016-11-03 The global south is entering an Urban Age where for the first time in history more people will be living in cities than in the countryside The logics of this prediction have a dominant framing rapid urbanization uncontrolled migration resource depletion severe fuel shortages and the breakdown of law and order We are told that we must be prepared The solution is simple they say Mega urbanization is an opportunity for economic growth and prosperity Therefore we must build big build new and build fast With contributions from an international range of established and emerging scholars drawing upon real world examples Mega Urbanization in the Global South is the first to use the lens of speed to examine the postcolonial urban revolution From the mega urbanization of Lusaka to the production of satellite cities in Jakarta to new cities built from scratch in Masdar Songdo and Rajarhat this book argues that speed is now the persistent feature of a range of utopian visions that seek to expedite the production of new cities These fast cities are the enduring images of postcolonial urbanism which bypass actually existing urbanisms through new power knowledge coalitions of producing knowing and governing the city The book explores three main themes Part I examines fast cities as new urban utopias which propagate the illusion that they are quick fix sustainable solutions to insulate us from future crises Part II

discusses the role of the entrepreneurial state that despite its neoliberalisation is playing a key role in shaping mega urbanization through laws policies and brute force Part III finally delves into how fast cities built by entrepreneurial states actually materialise at the scale of regional urbanization rather than as metropolitan growth This book explores the contradictions between intended and unintended outcomes of fast cities and points to their fault lines between state sovereignty capital accumulation and citizenship It concludes with a vision and manifesto for slow and decelerated urbanism This timely and original book presents urban scholars with the theoretical empirical and methodological challenges of mega urbanization in the global south as well as highlighting new theoretical agendas and empirical analyses that these new forms of city making bring to the fore

Mazzei, 2007 *Inhabited Silence in Qualitative Research* demonstrates or puts to work poststructural theory in the doing of qualitative research Using this theoretical approach the book proposes a data set lacking in the methodological literature namely silence It highlights the need for qualitative researchers not to dismiss silence as an omission or an absence of empirical materials but rather to engage silence as meaningful and purposeful This is an important book that should be read by researchers teachers and students

Secondary Moderns Brett Levinson, 1996 *Secondary Moderns* examines Lezama Lima's analyses of Latin American history and culture The study begins by carefully demonstrating how Lezama breaks with the modern Latin American intellectual tradition that has explored the question of Latin American in terms of an identity politics and moves on to a close reading of the theories of aesthetics representation resistance criticism death religion and ethics that Lezama puts forth via his notion of the American expression The work concludes by analyzing Lezama's politics of affirmation by scrutinizing his writings on Cuba and the Cuban Revolution *Secondary Moderns* represents a thorough analysis of Lezama's cultural project Latin American twentieth century thought and the complex intersection of Latin American studies and the post Heideggerian philosophical tradition Refuting labels that

have too hastily been attached to Lezama's difficult works those works have been dubbed elitist or transcendentalist the text strives to establish Lezama as one of the great thinkers of historicity in the modern age For while many critics have suggested that Latin American modernity is born via a reading and rewriting of Western discourses Lezama's American expression is the site where this theory is most radically put into practice The practice moreover permits one to understand not only Latin American cultural theory but Western thought itself indeed Lezama's aberrant reading of the West by its very aberrant character reveals aspects of the Western tradition never before explored

Charlotte Vaughan Coyle,2021-08-26 What kind of book is the Bible Is it a rulebook or a guidebook for moral living Is it a history book or a book filled with fascinating and sometimes fantastic stories Did humans write the Bible or did God somehow speak a perfect message that the authors transcribed Many people have asked these questions about the nature of this beautiful odd comforting disturbing book the church calls its Holy Scripture Charlotte Vaughan Coyle shares her own journey to make sense of the Bible in this read through the Bible in a year project She discovered that the crucial work of asking hard questions and even arguing with the Bible revealed the
