*Voicing the Ineffable* Siglind Bruhn, 2002 The relationship between music and religion has long been a clearly delineated one Up to the late Middle Ages music employed for ritual expressions of faith in sacred contexts was contrasted with secular music then mostly played in open spaces The former was believed to aid in the communication of divine truths while the latter was suspected of arousing sensuality and thus potentially leading away from the spiritual perspective of life In subsequent centuries music entered first the courtly salons then the concert hall and the home Such music created for virtuoso performance or for the enjoyment in private chambers occasionally made room for an expression of religious experiences outside the dedicated spaces of worship This aspect is particularly intriguing in instrumental music where allusions to extra musical messages are at best hinted at in titles or explanatory notes and in those cases of vocal music where it can be shown that the musical language adds significant nuances to the verbal text On the basis of various case studies that transcend a music analytical approach in the direction of the hermeneutic perspective this volume explores in which ways the musical language in itself independently of an explicitly sacred context communicates the ineffable The discussion focuses on the musical means and devices employed to this effect and on the question what the presence of religious messages in certain works of secular music tells us about the spirituality of an era

Wildman, 2018-10-09 In *Effing the Ineffable* Wesley J Wildman confronts the human obsession with ultimate reality and our desire to conceive and speak of this reality through religious language despite the seeming impossibility of doing so Each chapter is a meditative essay on an aspect of life that for most people is fraught with special spiritual significance dreaming suffering creating slipping balancing eclipsing loneliness intensity and bliss These moments can inspire religious questioning and commitment and in extreme situations drive us in search of ways to express what matters most to us Drawing upon American pragmatist Anglo American analytic and Continental traditions of philosophical theology Wildman shows how through direct description religious symbolism and phenomenological experience the language games of religion become a means to attempt and in some sense to accomplish this task
