Language, Culture, and Teaching Sonia Nieto, 2017-09-01 Distinguished multiculturalist Sonia Nieto speaks directly to current and future teachers in this thoughtful integration of a selection of her key writings with creative pedagogical features. Offering information, insights, and motivation to teach students of diverse cultural, racial, and linguistic backgrounds, examples are included throughout to illustrate real-life dilemmas about diversity that teachers face in their own classrooms, ideas about how language, culture, and teaching are linked, and ways to engage with these ideas through reflection and collaborative inquiry. Designed for upper undergraduate and graduate level students and professional development courses, each chapter includes critical questions, classroom activities, and community activities suggesting projects beyond the classroom context. *Language Culture and Teaching* explores how language and culture are connected to teaching and learning in educational settings, examines the sociocultural and sociopolitical contexts of language and culture to understand how these contexts may affect student learning and achievement, analyzes the implications of linguistic and cultural diversity for classroom practices, school reform, and educational equity, encourages practicing and preservice teachers to reflect critically on their classroom practices as well as on larger institutional policies related to linguistic and cultural diversity based on the above understandings, and motivates teachers to understand their ethical and political responsibilities to work together with their students, colleagues, and families for more socially just classrooms, schools, and society. Changes in the Third Edition: This edition includes new and updated chapters, section introductions, critical questions, classroom and community activities, and resources, bringing it up to date in terms of recent educational policy issues and demographic changes in the U.S. and beyond. literacy to life as a socio cultural orientation to the teaching of literacy that takes seriously the relationship between language and power and orients readers to the social effects of texts Students and teachers are drawn into the key questions critical readers need to pose of texts Whose interests are served who benefits who is disadvantaged who is included and who is excluded The practical activities help readers grasp complex issues Extending the theoretical framework in Hilary Janks Literacy and Power with a rich range of completely new up to date activities that translate theory into practice Doing Critical Literacy is powerful relevant and useful for both pre and in service teacher education and for use in schools

Literacy and Power Hilary Janks,2009-10-16 Hilary Janks addresses key questions about literacy and power in this landmark text that is both engaging and accessible Her central argument is that competing orientations to critical literacy education domination power access diversity design foreground one over the other but are crucially interdependent and need to work together to create possibilities for redesign and social action that serve a social justice agenda She examines the theory underpinning each orientation and develops new theory in the argument for interdependence and integration Sitting at the interface between theory and practice constantly moving from one to the other the text is rich with examples of how to use these orientations in real teaching contexts and how to use them to counterbalance one another In the groundbreaking final chapter Janks considers how the rationalist underpinning of critical literacy tends to exclude the non rational shows ways of working beyond reason pleasure and play desire and the unconscious and makes the case that these need to be taken seriously given their power to cut across the work of critical literacy educators working from any orientation
