Language Studies Andrew Littlejohn, Sandhya Rao Mehta, 2012-12-04 As a defining characteristic of what it means to be human the use of language plays a central role in almost all human activity Language functions as a cornerstone in the construction of our identity and in the relationships we build It takes a central role in facilitating every enterprise we undertake creates the thread which forms our own biographies and enables us to play a part in the transmission and maintenance of our culture This pervasive nature of language means that it may form the starting point for an investigation into virtually any aspect of social life In recent years this has led to a stretching of the boundaries of language studies prompted by an intense cross fertilisation of ideas with a wide range of disciplines It is this cross fertilisation which forms the focus of the present collection Taken together the thirteen papers it contains provide an absorbing rich array of subjects touched by the centrality of language Encompassing themes from social psychology translation theory computer science forensics educational policy language change archaeology and literature the collection demonstrates that the study of language offers limitless possibilities to aid an understanding of the world in which we live International in scope the collection includes contributions from scholars well established in their fields at work in Europe the USA the Middle East and Asia As such the collection offers a stimulating perspective for readers in a wide range of contexts whether they themselves are principally concerned with language or are simply eager to see how the study of language may be relevant to their own discipline

The Routledge Handbook of Language Learning and Teaching Beyond the Classroom Hayo Reinders, Chun Lai, Pia Sundqvist, 2022-05-30 Informal language learning beyond the classroom plays an important and growing role in language learning and teaching This Handbook brings together the existing body of research and unites the various disciplines that have explored this area in order to present the current state of knowledge in one accessible resource Much of adult learning takes place outside of formal education and for language learning it is likely that out of class experiences play an equally important role It is therefore surprising that the role of informal language learning has received little attention over the years with the vast majority of research instead focusing on the classroom Researchers from a range of backgrounds

however have started to realise the important contribution of informal language learning both in its own right and in its relationship with classroom learning Studies in the areas of learner autonomy learning strategies study abroad language support learners voices computer mediated communication mobile assisted language learning digital gaming and many others all add to our understanding of the complex and intersecting ways in which learners construct their own language learning experiences drawing from a wide range of resources including materials teachers self study technology other learners and native speakers This Handbook provides a sound and comprehensive basis for researchers and graduate students to build upon in their own research of language learning and teaching beyond the classroom **Language**

Constructions in Cognitive Contexts Franziska Günther, 2016-11-07 In what ways are language cognition and perception interrelated Do they influence each other This book casts a fresh light on these questions by putting individual speakers cognitive contexts i e their usage preferences and entrenched patterns of linguistic knowledge into the focus of investigation It presents findings from original experimental research on spatial language use which indicate that these individual specific factors indeed play a central role in determining whether or not differences in the current and or habitual linguistic behaviour of speakers of German and English are systematically correlated with differences in non linguistic behaviour visual attention allocation to and memory for spatial referent scenes These findings form the basis of a new speaker focused usage based model of linguistic relativity which defines language perception cognition effects as a phenomenon which primarily occurs within individual speakers rather than between speakers or speech communities
