Language Evolution Contact Competition And Change:

Language Evolution Salikoko S. Mufwene, 2008-03-31 Languages are constantly changing New words are added to the English language every year either borrowed or coined and there is often railing against the decline of the language by public figures Some languages such as French and Finnish have academies to protect them against foreign imports Yet languages are species like constructs which evolve naturally over time Migration imperialism and globalization have blurred boundaries between many of them producing new ones such as creoles and driving some to extinction This book examines the processes by which languages change from the macroecological perspective of competition and natural selection In a series of chapters Salikoko Mufwene examines such themes as natural selection in language the actuation question and the invisible hand that drives evolution multilingualism and language contact language birth and language death the emergence of Creoles and Pidgins the varying impacts of colonization and globalization on language vitality This comprehensive examination of the organic evolution of language will be essential reading for graduate and senior undergraduate students and for researchers on the social dynamics of language variation and change language vitality and death and even the origins of linguistic diversity **Language Evolution** Salikoko S. Mufwene, 2021 **Language Evolution** Rudolf P.

Botha, 2016-03-03 Addresses the question how can we unravel the evolution of language given that there is no direct evidence about it **Language Competition and Shift in New Australia, Paraguay** Danae Perez, 2019-10-24 This book is an innovative sociolinguistic study of New Australia an Australian immigrant community in Paraguay in 1893 whose descendants today speak Guarani Providing fresh data on a previously under researched community who are an extremely rare case of language shifting from English heritage language to a local indigenous language the case study is situated within the wider context of the colonial and post colonial spread of English in Latin America over the past century Drawing on insights from linguistic anthropology sociolinguistics Latin American studies and history the author presents the history of the colony before closely analysing the interplay of language and identity in this uniquely diasporic setting This book fills a longstanding gap in the World Englishes and heritage languages literature and it will be of interest to scholars of colonial and postcolonial languages and minority language more generally **Changing English** Markku Filppula, Juhani

Klemola, Anna Mauraanen, Svetlana Vetchinnikova, 2017-10-10 This book examines the special nature of English both as a global and a local language focusing on some of the ongoing changes and on the emerging new structural and discursal characteristics of varieties of English Although it is widely recognised that processes of language change and contact bear affinities for example to processes observable in second language acquisition and lingua franca use the research into these fields has so far not been sufficiently brought into contact with each other The articles in this volume set out to combine all these perspectives in ways that give us a better understanding of the changing nature of English in the modern world

The Linguistics of the History of English Remco Knooihuizen, 2023-10-27 This textbook approaches the history of

English from a theoretical perspective The book provides a brief chronological overview describing the way in which the English language has changed over time from Old English to Modern English while subsequent parts adopt a theoretical focus that is thematically organised to deal with the question of how and why English changed in the way it did including a part addressing some specific contact induced changes and key topics such as English as a Lingua Franca Supported throughout with information boxes with empirical studies the examples given are all drawn from English but boxes with examples from other languages tie the development of the English language into changes in other contexts and settings This book is an ideal resource for undergraduate students of the English Language and historical linguistics **New**

Perspectives on Lexical Borrowing Eline Zenner, Gitte Kristiansen, 2013-11-27 This volume aims to broaden the focus of existing loanword research which has mainly been conducted from a systemic and structuralist perspective The eight studies in this volume introduce onomasiological phraseological and methodological innovations to the study of lexical borrowing These new perspectives significantly enhance our understanding of lexical borrowing and provide new insights into contact induced variation and change *Studies in the History of the English Language VI* Michael Adams, Laurel J. Brinton, R.D.

Fulk, 2014-12-12 The relationships among data evidence and methodology in English historical linguistics are perennially vexed This volume which ranges chronologically from Old to Present Day English and from manuscripts to corpora challenges a wide variety of assumptions and practices and illustrates how diverse methods and approaches construct evidence for historical linguistic arguments from an increasingly large and diverse body of linguistic data English

Austronesian languages exhibit isolating word structure This volume offers a series of investigations into these languages which are found in an isolating crescent extending from Mainland Southeast Asia through the Indonesian archipelago and into western New Guinea Some of the languages examined in this volume include Cham Minangkabau colloquial Malay Indonesian and Javanese Lio Alorese and Tetun Dili The main purpose of this volume is to address the general question of how and why languages become isolating by examination of a number of competing hypotheses While some view morphological loss as a natural process others argue that the development of isolating word structure is typically driven by language contact through various mechanisms such as creolization metatypy and Sprachbund effects This volume should be of interest not only to Austronesianists and historians of Insular Southeast Asia but also to grammarians typologists historical linguists creolists and specialists in language contact

Åfarli, Brit Maehlum, 2014-04-16 The aim of this book is to investigate and attain new insights on how and to what extent the wider sociolinguistic context of language use and contact impinges on formal grammatical structures The papers contained in the book approach this important problem from various points of view by focusing on language evolution and change on multilingualism language mixing and dialect variation on spoken language and on creole languages Given the theoretical perspectives methodological focus and analyses the book will be of interest to theoretical linguists as well as sociolinguists from undergraduate students to researchers

Ecological Perspectives on Language Endangerment and Loss Salikoko S. Mufwene, 2025-07-01 This book discusses various issues arising from the dominant discourse on language endangerment and loss in linguistics Are the terms mother tongue heritage language and ancestral language interchangeable Does a child receiving formal education in a mother tongue different from that of his/her parents lose a culture that he/she should otherwise inherit Is a language separate from the culture in which its speakers evolve and it is being practiced Thus is a population shifting to a dominant language necessarily abandoning its traditional culture ipso facto or is it also reshaping it along with that associated with the new language into a new mixed culture Are cultures intended to be static Must speakers of particular languages be wedded to them in the same way they are to their genes What can we learn about language shift language vitality and human adaptiveness from the protracted history of mankind These and a host of other issues regarding the intertwining of colonization globalization language and culture are discussed in this book inviting linguists and other interested scholars to be critical participants in the current debate
