Language Of Feelings:

The Language of Emotions ... Niemeier-Dirven, René Dirven, 1997-01-01 Since the celebration of the 100th anniversary of Darwin's *The Language of the Emotions in Man and Animals* 1872 emotionology has become a respectable and even thriving research domain again. The domain of human emotions is most important for mankind, emotions being right in the center of our daily lives and interests. A key role in the interdisciplinary scientific debate about emotions has now been accorded to the study of the language of emotions. The present volume offers a new approach to the study of the language of emotions insofar as it presents theories from very different perspectives. It encompasses studies by scholars from diverse disciplines such as linguistics, sociology, and psychology. The topics of the contributions also cover a range of special fields of interest in four major sections. In a first section a discussion of theoretical issues in the analysis of emotions is presented. The conceptualization of emotions in specific cultures is analyzed in section 2. Section 3 takes a different inroad into the language of emotions by looking at developmental approaches giving evidence of the fact that the acquisition of the language of emotions is a social achievement that simultaneously determines our experience of these emotions. Section 4 is devoted to emotional language in action that is the contributions focus upon different types of texts and analyze how emotions are referred to and expressed in discourse.

The Secret Language of Feelings Calvin D. Banyan, 2003 This book reveals what people have wanted to know about the human condition from the very beginning of time. What are feelings for? Within its pages you will discover the secret language of feelings. That language is a voice within us. Sometimes it is as soft as a whisper, sometimes it is as loud as a roar. It is an important voice which, when fully understood, gives you a kind of guidance that no other voice can. The information in *The Secret Language of Feelings* was revealed during thousands of hours of working with hypnotherapy clients at the Banyan Hypnosis Center for Training; however, it would make a perfect companion book for anyone involved in any therapy process or working on self-improvement. *The Secret Language of Feelings* gives you a rational and reliable approach to understanding and responding to your feelings and emotions. It shows you how to create a more satisfying life right now. You will learn how to overcome anger, guilt, frustration, sadness, loneliness, and even everyday depression. You will better understand yourself, your family, and the people you interact with on a daily basis. In short, *The Secret Language of Feelings* offers the key to emotional rescue and beyond to happiness and success in life. **The**

Words in Emotions? Cornelia Herbert, Thomas Ethofer, Andreas J. Fallgatter, Peter Walla, Georg Northoff, 2018-09-28

Language has long been considered independent from emotions. In the last few years however research has accumulated empirical evidence against this theoretical belief of a purely cognitive based foundation of language. In particular through research on emotional word processing it has been shown that processing of emotional words activates emotional brain structures, elicits emotional facial expressions and modulates action tendencies of approach and avoidance probably in a similar manner as processing of non verbal emotional stimuli does. In addition it has been shown that emotional content is already processed in the visual cortex in a facilitated manner which suggests that processing of emotional language content is able to circumvent in depth semantic analysis. Yet this is only one side of the coin. Very recent research putting words into context suggests that language may also construe emotions and that by studying word processing one can provide a window to one's own feelings. All in all the empirical observations support the thesis of a close relationship between language and emotions at the level of word meaning as a specific evolutionary achievement of the human species. As such this relationship seems to be different from the one between emotions and speech where emotional meaning is conveyed by nonverbal features of the voice. But what does this relationship between written words and emotions theoretically imply for the processing of emotional information? The present Research Topic and its related articles aim to provide answers to this question. This book comprises several experimental studies investigating the brain structures and the time course of emotional word processing. Included are studies examining the affective core dimensions underlying affective word processing and studies that show how these basic affective dimensions influence word processing in general as well as the interaction between words, feelings and expressive behavior. In addition new impetus comes from studies that on the one hand investigate how task sublexical and intrapersonal factors influence emotional word processing and on the other hand extend emotional word processing to the domains of social context and self related processing. Finally future perspectives are outlined including research on emotion and language acquisition, culture and multilingualism. In summary this textbook offers scientists from different disciplines insight into the neurophysiological, behavioral and subjective mechanisms underlying emotion and language interactions. It gives new impulses to existing theories on the embodiment of language and emotion and provides new ways of looking at emotion cognition interactions. *Emotions in Multiple Languages* J.

Dewaele, 2010-08-11 A large scale investigation on how multilinguals feel about their languages and use them to communicate emotion. Combining quantitative and qualitative approaches the author looks at the factors that affect multilinguals' self perceived competence, attitudes, communicative anxiety, language choice and code switching. **The Language of**
