Latest Engineering Learnership 2014 And 2015:

Vocational Education and Training in Times of Economic Crisis Matthias Pilz, 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training VET Revealing how youth in transition is affected by economic crises it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe e.g. Spain Germany or the UK to Asia such as China Thailand and India Though each country examined in this volume is affected by the economic crisis in a different way the effects are especially apparent for the young generation In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best The contributions in this volume demonstrate that VET alone cannot solve these problems but can be used to support a smooth transition from school to work If the quality of VET is high and the status and job expectations are good VET can help to fill the skills gap especially at the intermediate skill level Furthermore VET can also offer a realistic alternative to the university track for young people in many countries

Contemporary Apprenticeship Reforms and Reconfigurations Thomas Deißinger, Ursel Hauschildt, Philipp Gonon, 2019 INAP the International Network on Innovative Apprenticeship has steadily grown to incorporate researchers from all over the world In 2019 it's 8th international conference hosted by Konstanz University Germany points to various issues linked to contemporary apprenticeship reforms and reconfigurations which indicates the need for apprenticeships to deliver on its promise of workplace skills and for it to evolve and also to change as the world economies develop Apprenticeship is a model of work and training which has benefits for many different types of economies and societies Specific areas of research are represented in Konstanz by the following topics and from different countries perspectives Governance and Stakeholders Teaching and Learning Academisation in Apprenticeships Diversity and Inclusiveness Internationalisation and Transfer of VET Services Future Work New Employment Patterns Future Work Industry 4.0 School to Work Transition and Youth Employment Modern Fields of TVET Research and Practice Training Engineering Students for Modern Technological Advancement Alves, Anabela Carvalho, van Hattum-Janssen, Natascha, 2021-12-17

Engineering education leads the preparation of the next generation of engineers This is a difficult task as engineering practices rapidly evolve pressured by the technological advancements promoted by these same engineers Engineering schools are integrated into large and rigid higher education institutions HEI that are not known for their agility Nevertheless engineering educators must have the agility to go beyond HEI boundaries to close the gap between professional practice needs and engineering education Training Engineering Students for Modern Technological Advancement examines the role of engineering teachers in preparing the next generation of engineers and presents perspectives on active learning methods for engineering education As such it contributes to bypassing the compartmentalized way of course organization typical in many HEIs and prepares for more agile engineering education Covering topics such as game based teaching
