

An illustration of a roller coaster construction site. In the foreground, a woman wearing a red hard hat and a red shirt is looking at a blueprint on a clipboard. To her right, two men are standing; one is wearing a blue hard hat and a yellow safety vest, and the other is wearing a red hard hat and a grey shirt. They are both holding large sheets of paper. In the background, a red roller coaster track is being built, with several loops and drops. To the left, a yellow and orange roller coaster car is suspended from a track. The sky is blue with a large white cloud. The overall scene is a colorful and dynamic representation of a roller coaster's construction.

Elementary Mathematics Curriculum Materials Janine T. Remillard,Ok-Kyeong Kim,2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors **The Teacher's Guide to Inclusive Education** Peggy A.
