includes contributions from internationally renowned scholars It will be of interest to researchers in systemic functional linguistics or language and education **Resources in Education** ,2001 *The Register-Functional Approach to Grammatical Complexity* Douglas Biber,Bethany Gray,Shelley Staples,Jesse Egbert,2021-12-30 This collection brings together the authors previous research with new work on the Register Functional RF approach to grammatical complexity offering a unified theoretical account for its further study The book traces the development of the RF approach from its foundations in two major research strands of linguistics the study of sociolinguistic variation and the text linguistic study of register variation Building on this foundation the authors demonstrate the RF framework at work across a series of corpus based research studies focused specifically on grammatical complexity in English The volume highlights early work exploring patterns of grammatical complexity in present day spoken and written registers as well as subsequent studies which extend this research to historical patterns of register variation and the application of RF research to the study of writing development for L1 and L2 English university students Taken together along with the addition of introductory chapters connecting the different studies the volume offers readers with a comprehensive resource to better understand the RF approach to grammatical complexity and its implications for future research The volume will appeal to students and scholars with research interests in either descriptive linguistics or applied linguistics especially those interested in grammatical complexity and empirical corpus based approaches **Preparing Teachers to Work with Multilingual Learners** Meike Wernicke,Svenja Hammer,Antje Hansen,Tobias Schroedler,2021-04-15 This collection examines a diverse range of approaches to multilingualism in teacher education programmes across Europe and North America The authors investigate how pre service teachers are being prepared to work in multilingual contexts and discuss the key features of current pre service teacher education initiatives that address the increasing linguistic and cultural diversity evident in classrooms in their respective countries The focus is not only on migrant background learners but includes students from Indigenous autochthonous and heritage language backgrounds and speakers of minoritised regional varieties The chapters contextualise both historically and ideologically the specific initiatives and measures taken in the participating countries They also reveal the complexity of each educational context and the role that history language policies and institutional and programmatic priorities play in the development and implementation of a multilingual focus in teacher education In exploring how pre service teachers are being prepared to work in multilingual contexts the authors take a critical view of how multilingualism itself is conceptualised within and across contexts The book highlights the valuable impact that explicit instruction on theories of multilingualism pedagogies in multilingual classrooms and lived realities of multilingual children can have on the beliefs and practices of pre service teachers **Disciplinary: Functional Linguistic and Sociological Perspectives** Frances Christie,Karl Maton,2011-02-03 Disciplinary knowledge is under threat in the modern world Claims abound that we are entering a landscape in which the division of disciplines is obsolete implying a commitment to outdated values in

scholarship Notions of discipline are critiqued as reflecting social power and representing the worldview of dominant social groups By addressing and challenging such claims this edited collection argues that proclamations of the death of disciplines have been greatly overstated Not only are the notions of disciplinarity still important for understanding how we come to know the world but this volume demonstrates how significant disciplinarity is to understanding different forms of knowledge if we wish to improve the building of knowledge and educational practice Using analytical tools from systemic functional linguistics theory and social realist sociology this volume illustrates how different disciplines can collaborate and cross fertilize successfully without losing their distinctive insights and disciplinary integrity The subsequent theory developed will thereby extend both linguistic and sociological approaches to the topic and make a major contribution to educational theory

Meaning Making in Text S. Starc,C. Jones,A. Maiorani,2015-05-05 Meaning Making in Text presents new insights into forms of communication in a range of contexts cultural linguistic multimodal and educational The thirteen chapters are all linked theoretically by advances in Systemic Functional Linguistics SFL

School Discourse Frances Christie,Beverly Derewianka,2010-09-17
