Languages In Contact The Partial Restructuring Of Vernaculars:

Languages in Contact John Holm, 2003-12-18 There is widespread agreement that certain non Creole language varieties are structurally quite different from the European languages out of which they grew however until recently linguists have found difficulty in accounting for either their genesis or their synchronic structure This 2003 study argues that the transmission of source languages from native to non native speakers led to partial restructuring whereby some of the source languages morphosyntax was retained but a significant number of substrate and interlanguage features were also introduced Comparing languages such as African American English Afrikaans and Brazilian Vernacular Portuguese John Holm identifies the linguistic processes that lead to partial restructuring bringing into focus a key span on the continuum of contact induced language change which has not previously been analysed Informed by the first systematic comparison of the social and linguistic facts in the development of these languages this book will be welcomed by students of contact linguistics sociolinguistics and anthropology

Michaelis, Philippe Maurer, Martin Haspelmath, Magnus Huber, 2013 The most authoritative guide ever published to the world s pidgin and creole languages The 3 volume Survey describes their histories and linguistic characteristics The Atlas of Pidgins and Creoles published at the same time shows how 130 linguistic features are distributed among the world s languages **Language Interrupted** John McWhorter, 2007-06-18

Foreigners often say that English language is easy A language like Spanish is challenging in its variety of verb endings the verb speak is conjugated hablo hablas hablamos and gender for nouns whereas English is more straight forward I speak you speak we speak But linguists generally swat down claims that certain languages are easier than others since it is assumed all languages are complex to the same degree For

example they will point to English's use of the word *do* *Do you know French*. This usage is counterintuitive and difficult for non-native speakers. Linguist John McWhorter agrees that all languages are complex but questions whether or not they are all equally complex. The topic of complexity has become a hot issue in recent years particularly in creole studies, historical linguistics and language contact. As McWhorter describes, when languages came into contact over the years, when French speakers ruled the English for a few centuries or the Vikings invaded England, a large number of speakers are forced to learn a new language quickly and this came up with a simplified version, a pidgin. When this ultimately turns into a real language, a creole, the result is still simpler and less complex than a non-interrupted language that has been around for a long time. McWhorter makes the case that this kind of simplification happens in degrees and criticizes linguists who are reluctant to say that, for example, English is simply simpler than Spanish for socio-historical reasons. He analyzes how various languages that seem simple but are not creoles actually are simpler than they would be if they had not been broken down by large numbers of adult learners. In addition to English, he looks at Mandarin Chinese, Persian, Malay and some Arabic varieties. His work will interest not just experts in creole studies and historical linguistics but the wider community interested in language complexity.

Language Change Anna Mauranen, Svetlana Vetchinnikova, 2020-12-03 English as a lingua franca (ELF) has become ubiquitous in today's globalised, mobile and fast-changing world. It is clear that it will have an unprecedented impact not only on how we communicate but also on our understanding of language use and change. What exactly ELF brings to our life and to language theory is a question which requires an interdisciplinary take. This book gathers together leading scholars from world Englishes, typology, language history, cognitive linguistics, translation studies, multilingualism, sociolinguistics and ELF research itself to seek state-of-the-art answers. Chapters present original insights on language change based on theoretical approaches and empirical studies and provide clear examples of social interactional and cognitive changes that ELF instigates. The picture which unfolds on the pages of this book is complex, dynamic and makes a convincing case for the importance of English as a lingua franca on language change at a global scale.

Creoles, Revisited Nicholas G. Faraclas, Sally J. Delgado, 2021-05-16 This innovative book contributes to a paradigm shift in the study of creole languages, forging new empirical frameworks for understanding language and culture in sociohistorical contact. The authors bring together archival sources to challenge dominant linguistic theory and practice and engage issues of power, positioning marginalized indigenous peoples as the center of and vital agents in these languages' formation and development. Students in language contact, pidgins and creoles, Caribbean studies and postcolonial studies courses and scholars across many disciplines will benefit from this book and be convinced of the importance of understanding creoles and creolization.
