Las Vegas Architecture In Context:

Stripping Las Vegas Karin Jaschke, Silke Ötsch, 2003 Las Vegas Frances Anderton, John Chase, 1997 Las Vegas; the success of excess; architecture in context F. Anderton, 1997 Las Vegas Frances Anderton, 1997 Architecture in Context Hassan Radoine, 2017-04-26

Architecture in Context Designing in the Middle East provides a foundation for understanding the critical context of architecture and design in this region. It does this by presenting a practical overview of architectural know how in the Middle East and its potential for cultivating a sense of place introducing local architectural vocabularies and styles and how they can still be reactivated in contemporary design exploring the cultural and contextual meaning of forms as references that may influence contemporary architecture discussing important discourses and trends in architecture that allow a rethinking of the current global local dichotomy. Highly illustrated the book covers architecture and design in North Africa the Levant the Gulf and Turkey Iran and Iraq.

Architecture and Leadership Mark Roberson, Alicia Crumpton, 2022-12-12

From cathedrals to cubicles people go to great lengths and expense to design their living and working environments. They want their spaces to be places where they enjoy being reflecting who they are and what they care about. The resultant environments in turn become loud albeit unvoiced leaders for people occupying those corresponding spaces. The design and use of work and living spaces typifies and thematizes expectations for the group. Essentially the architecture of rooms buildings and cities creates cultures by conveying explicit and implicit messages. This is evident when people approach and walk into St Basil's Cathedral in Moscow the Forbidden City in Beijing the Sydney Opera House in Sydney Australia the Jewish Museum in Berlin or the Rothko Chapel in Houston to name some examples. While leaders oftentimes lack the resources to have their spaces mirror the greatest architectural achievements of the world they are in a position to use the art and science of architecture at whatever scale is available to their advantage. The creative and intentional use of space and place advances and promotes cherished values and enhances organizational effectiveness. This book explores the essence of good architecture and establishes relevant connections for leaders and managers to strategically design and use the organizational workplace and space to support their mission and purpose and create aesthetically meaningful work environments. It equips leaders to be culturally astute on what defines good architecture and to incorporate principles of beauty in their leadership practices accordingly and will be of interest to researchers academics professionals and students in the fields of leadership organizational studies and architecture theory and practice.

The Strip Stefan Al, 2017-03-03

The transformations of the Strip from the fake Wild West to neon signs twenty stories high to starchitecture and how they mirror America itself. The Las Vegas Strip has impersonated the Wild West with saloon doors and wagon wheels it has decked itself out in midcentury modern sleekness. It has illuminated itself with twenty story high neon signs then junked them. After that came Disney like theme parks featuring castles and pirates followed by replicas of Venetian canals New York skyscrapers and the Eiffel Tower. It might be noted that

forty two million people visited Las Vegas in 2015 ten million more than visited the real Paris More recently the Strip decided to get classy with casinos designed by famous architects and zillion dollar collections of art Las Vegas became the implosion capital of the world as developers driven by competition got rid of the old to make way for the new offering a non metaphorical definition of creative destruction In The Strip Stefan Al examines the many transformations of the Las Vegas Strip arguing that they mirror transformations in America itself The Strip is not as popularly supposed a display of architectural freaks but representative of architectural trends and a record of social cultural and economic change Al tells two parallel stories He describes the feverish competition of Las Vegas developers to build the snazziest most tourist grabbing casinos and resorts with a cast of characters including the mobster Bugsy Siegel the eccentric billionaire Howard Hughes and the would be political kingmaker Sheldon Adelson And he views the Strip in a larger social context showing that it has not only reflected trends but also magnified them and sometimes even initiated them Generously illustrated with stunning color images throughout The Strip traces the many metamorphoses of a city that offers a vivid projection of the American dream

Co-teaching and co-research in contexts of inequality Phindile Zifikile Shangase, Daniela Gachago, Eunice Ndeto Ivala, 2023-05-09 There has been a recent surge of interest in the concept of co teaching and co research across institutions of HE locally and globally as a response to limited international mobility due to COVID 19 We see co teaching and co research as teaching and research that connects educators and learners across different institutions and different contexts be it across South Africa Africa or the world Co teaching and co research is linked in this book to the term networked learning following the Networked Learning Editorial Collective s emphasis on relationships and collaboration rather than technology and foregrounding our strong commitment to social justice Our collective experiences have shown that co teaching and co research are not easy endeavours especially when they involve differently positioned and differently resourced contexts students and academics While these collaborations are enriching and exciting they need careful support preparation and time for sustained relationship building topics that we find are not necessarily discussed in the literature around co teaching and co research This book is an attempt towards closing this gap in knowledge by providing a range of chapters documenting personal experiences of academics and practitioners engaging in co teaching and co research across the African continent and beyond facilitated by various networked learning tools and technologies Framed by a spirit of sharing and connection the book provides insights into the benefits and challenges of such collaborations affordances of technologies to bridge unequal divides emerging practices of continental collaboration and beyond Additionally the book provides an unusually honest and nuanced view on co teaching and co research across contexts of inequalities foregrounding relationship and community building rather than technology and emphasising the importance of sustained connection and reflection in these collaborations Applying a wide range of critical theoretical frameworks these evidence based but also reflective and reflexive contributions are a unique and important reminder that behind and through our screens we connect

as humans who yearn to learn from each other but also need to learn how to learn from each other when we do not share the same world views

Architecture and Ugliness Wouter Van Acker, Thomas Mical, 2020-01-09 Whatever ugliness is it remains a problematic category in architectural aesthetics alternately vilified and appropriated used either to shock or to invert conventions of architecture This book presents sixteen new scholarly essays which rethink ugliness in recent architecture from Brutalism to eclectic postmodern architectural productions and together offer a diverse reappraisal of the history and theory of postmodern architecture and design The essays address both broad theoretical questions on ugliness and postmodern aesthetics as well as more specific analyses of significant architectural examples dating from the last decades of the twentieth century The book attends to the diverse relations between the aesthetic register of ugliness and closely connected aesthetic concepts such as the monstrous the ordinary disgust the excessive the grotesque the interesting the impure and the sublime This volume does not simply document the history of a postmodern anti aesthetic through case studies Instead it aims to shed light on aesthetic problems that have been largely overlooked in the agenda of architectural theory This book answers in detail the questions How did postmodern architects appropriate troublesome contradictions bound to the raw ugliness of the real How have the ugly and the antiaesthetic been a productive force in postmodern architecture How can ugliness be of value to architecture And how can architecture make good use of ugliness

Research Methods and Techniques in Architecture Elzbieta Danuta Niezabitowska, 2018-07-11 A scientific approach to architectural and architectonic research from the scope of just one discipline is no longer sufficient With contemporary considerations such as behavior health and environmental protection architects and students alike need holistic research methodologies that incorporate qualitative elements as well as more traditional quantitative ones Research Methods and Techniques in Architecture examines research methodologies and tools applied in science and architectonic practice Beginning with a thorough introduction to the main scientific environmental and architectural theories of the late twentieth century the book guides the reader through the different aspects of architectural research design building research teams choosing applicable research methods and representing research results

Complexity Andrea Gleiniger, Georg Vrachliotis, 2012-11-05 Digitalization has transformed the discourse of architecture that discourse is now defined by a wealth of new terms and concepts that previously either had no meaning or had different meanings in the context of architectural theory and design Its concepts and strategies are increasingly shaped by influences emerging at the intersection with scientific and cultural notions from modern information technology The series Context Architecture seeks to take a critical selection of concepts that play a vital role in the current discourse and put them up for discussion When Vitruvius described the architect as a *uomo universale* he gave rise to the architect's conception of him or herself as a generalist who shapes a complex reality The architectural concept of complexity however failed to keep pace with industrial and social reality becoming instead an increasingly formal and superficial notion that could ultimately be applied to almost anything Against it

architectural modernism set the watchword of simplification less is more In this situation Robert Venturi reintroduced the notion of complexity into architectural discourse his goal was not just to restore the complexity of architectonic forms and their history but also to explore the concrete reality of the existing built environment Today it is complexity studies with their starting point in physics that define the current approach to the concept of complexity They have established a new connection between the natural sciences and information technology and have thus become a central premise of computer based approaches to design
