Signs, Streets, and Storefronts Martin Treu, 2012-10-30 Treu tackles the architectural history and signage of Main Street and the strip from painted boards nailed over crude storefronts to sleek cinemas topped with neon glitz Honorable Mention Architecture and Urban Planning 2012 PROSE Awards Signs Streets and Storefronts addresses more than 200 years of signs and place marking along America s commercial corridors From small town squares to Broadway State Street and Wilshire Boulevard Martin Treu follows design developments into the present and explores issues of historic preservation

Treu considers common architecture and its place defining business signs as well as influential high style design examples by taste making leaders Combining advertising and architectural history the book presents a full picture of the commercial landscape including design adaptations made for motorists and the migration from Main Street to suburbia The dynamic between individual businesses and the common good has a major effect on the appearance of our country s Main Streets Several forces are at work technological advances design imagination and the media corporate propaganda customer needs and municipal mandates Present day controls have often led to a denuding of traditional commercial corridors Such reform Treu argues has suppressed originality and radically cleared away years of accumulated history based on the taste of a single generation A must read for city planners town councils architects sign designers concerned citizens and anyone who cares about the appearance and vitality of America s commercial streets this heavily illustrated book is equally appealing to armchair historians small town enthusiasts and lovers of Americana Douglas Snelling Davina Jackson,2016-12-01 Douglas Burrage Snelling 1916 85 was one of Britain s significant emigr architects and designers Born in Kent and educated in New Zealand he became one of Australia s leading mid century architects of luxury residences and commercial buildings and a trend setting designer of furniture interiors and landscapes This is the first comprehensive study of Snelling s pan Pacific life works and trans disciplinary significance It provides a critical examination of this controversial modernist revealing him to be a colourful and talented protagonist who led antipodean interpretations of American especially Wrightian and southern Californian architecture design and lifestyle innovations *Architecture and Dystopia* Dario Donetti,2020-02-08 A homage to the 1973 publication of *Architecture and Utopia* by Manfredo Tafuri echoed in the title this book is devoted to the radical experiences of the 1960s and to their consequences for the most recent developments in contemporary architecture As a response to the profound crisis of Western culture the emerged in the 1960s radical artists from Italy Austria England and Japan called into question the foundations of modernist utopias They transmuted the difficulties of capitalism into a repertory of startling images that revealed the disturbing realities of consumer society even in those places still resistant to the penetration of modern architecture such as Superstudio and Archizoom s Florence Their model though exhausted in the space of experimentation went on to inspire a generation of architects from the High Tech movement to Rem Koolhaas who sought to employ the paradigm of dystopia as both a visionary and a constructive method one which could operate on the architecture of late capitalism and generate unexpected possibilities for urban planning In the light of these examples how to define a unified dystopian method of design i e a common ground for an architecture that by its very nature seems to resist systematization Are the most recognizable architectural expressions of this theoretical framework characterized by brazen displays of technology and structures of overwhelming scale merely isolated cases albeit of particular iconic power Or do they belong to a wider landscape of antirational architectural projects And to what extent are these disturbing expressions premised on the utopian tradition or better yet the conceptual model of negative thought The goal of this book is to respond

to such questions thus initiating an open dialogue about the legitimacy of this critical category With contributions by Dario Donetti Marco De Michelis Oliver Elser Dominique Rouillard Marco Biraghi Marie Theres Stauffer Maddalena Scimemi Simon Sadler Massimiliano Savorra and Anthony Vidler

Frank Furness George E. Thomas, 2018-02-27 Frank Furness 1839 1912 has remained a curiosity to architectural historians and critics somewhere between an icon and an enigma whose importance and impact have yet to be properly evaluated or appreciated To some his work pushed pattern and proportion to extremes undermining or forcing together the historic styles he referenced in such eclectic buildings as the Pennsylvania Academy of the Fine Arts and the University of Pennsylvania Library To others he was merely a regional mannerist creating an eccentric personal style that had little resonance and modest influence on the future of architecture By placing Furness in the industrial culture that supported his work George Thomas finds a cutting edge revolutionary who launched the beginnings of modern design played a key part in its evolution and whose strategies continue to affect the built world In his sweeping reassessment of Furness as an architect of the machine age Thomas grounds him in Philadelphia a city led by engineers industrialists and businessmen who commissioned the buildings that extended modern design to Chicago Glasgow and Berlin Thomas examines the multiple facets of Victorian Philadelphia s modernity looking to its eager embrace

of innovations in engineering transportation technology and building and argues that Furness working for a particular cohort of clients played a central role in shaping this context His analyses of the innovative planning formal and structural qualities of Furness's major buildings identifies their designs as initiators of a narrative that leads to such more obviously modern figures as Louis Sullivan William Price Frank Lloyd Wright and eventually the architects of the Bauhaus Misunderstood and reviled in the traditional architectural centers of New York and Boston Furness's projects commissioned by the progressive industrialists of the new machine age intentionally broke with the historical styles of the past to work in a modern way from utilizing principles based on logistical planning to incorporating the new materials of the industrial age Lavishly illustrated the book includes more than eighty black and white and thirty color photographs that highlight the richness of his work and the originality of his design spanning more than forty years

Route 66 in California Glen Duncan, 2005 The Mother Road hauled it all traversing the American West from Chicago to Santa Monica Beach the last 350 miles through Southern California For settlers Depression era Okies and Arkies and post World War II families bound for suburbia Route 66 was a migration funnel for generations Wending through the mountains and badlands of San Bernardino County into Los Angeles County Route 66 became a state of mind and a catchphrase for travelers everywhere especially after singer Bobby Troup popularized the hit song Get Your Kicks on Route 66 and actors Martin Milner and George Maharis hit the road with the ragtop down and the shades on in the namesake television series that seemed to go anywhere every week The shield of the Route 66 sign has become iconography for the growth of Southern California's economy population popularity and folklore

Master of the Midcentury Catherine Cody, Jo Lauria, Don Choi, 2021-09-14 Master of the Midcentury The Architecture of William F Cody is the first long overdue book on this key Palm Springs architect abundantly illustrated and detailed Of the architects who made Palm Springs a crucible of midcentury American modernism William F Cody 1916-1978 was one of the most prolific diverse and iconic Directing a practice ranging from residences to commercial centers and industrial complexes to master plans Cody's designs are so recognizable that they provide visual shorthand for what is widely hailed as Desert Modern While his

architecture was disciplined and technically innovative. Cody did not practice an austere modernism; he imbued in his projects a love for social spaces rich with patterns, texture, color, and art. Though the majority of Cody's built work was concentrated in California and Arizona, he had commissions in other western states: Hawaii, Mexico, Honduras, and Cuba. From icons like the Del Marcos Hotel (1946) to inventive country clubs like the Eldorado (1957) to houses for celebrities (Frank Sinatra, Bing Crosby, Walt Disney), Cody's projects defined the emerging West Coast lifestyle that combined luxury, leisure, and experimental design. Cody also pushed the boundaries of engineering with beams and roof slabs so thin that his buildings seemed to defy gravity.

Master of the Midcentury is the first monograph devoted to Cody, authored by the team that curated the acclaimed exhibition *Fast Forward: The Architecture of William F. Cody* at the Architecture and Design Museum in Los Angeles: his daughter, Cathy Cody, design historian Jo Lauria, and architectural historian Don Choi. Replete with photographs of extant and now lost structures, as well as masterful color renderings and drawings for architectural commissions and plans for vanguard building systems, *Master of the Midcentury* is the authoritative resource on Cody.
