**Narratives of Qualitative Research** Josh Tenenber,2024-05-21 Narratives of Qualitative Research uses a novel form of writing about how to do qualitative research called a praxis narrative Each narrative is told from the author s perspective

in carrying out one of his past research studies in the social sciences Told chronologically and in a first person voice the narratives position the reader alongside the narrator so as to vicariously experience how research happens in its situated particulars Rather than a set of idealizations and universalized pronouncements the author reveals what really goes on when one is in the thick of complex and challenging research studies the points of trouble along with the successes This will be relevant to researchers who have already undertaken one or more empirical research studies though not necessarily using qualitative approaches and now find themselves facing something new a new analytic method a new theoretical lens a new form of data collection a new domain of research questions a new rhetorical approach This requires letting go of the secure handholds of prescribed methods and responding to the contingencies that arise in the midst of the research The reader is invited to follow along as the author makes visible his praxis of qualitative research Unlike more conventional texts in this unique alternative the reader can follow the author's journey through his research studies as a way to reorient their conception of qualitative research and their own praxis of it This is fascinating reading for qualitative researchers and students taking qualitative research courses across the social sciences education and behavioural sciences

*Remote Sensing for Archaeology and Cultural Landscapes* Diofantos G. Hadjimitsis, Kyriacos Themistocleous, Branka Cuca, Athos Agapiou, Vasiliki Lysandrou, Rosa Lasaponara, Nicola Masini, Gunter Schreier, 2019-06-07 This book investigates the added value that satellite technologies and remote sensing could provide for a more sustainable mapping monitoring and management of heritage sites be it for purposes of regular maintenance or for risk mitigation in case of natural or man caused hazards One of the major goals of this book is to provide a clear overview on policy perspectives regarding both space policy as well as heritage policy and to provide possible suggestions for common ground of these two fields in Europe and around the world Readers will develop a good understanding of cutting edge applications of remote sensing and geographic information science and the challenges that affect heritage maintenance and protection Particular attention is given to Earth observation and remote sensing techniques applied in different locations This book brings together innovative technologies concrete applications and policy perspectives that can lead to a more complete vision of cultural heritage as a resource for future development of our society as a whole

*Popular Culture as Everyday Life* Dennis Waskul, Phillip Vannini, 2015-11-19 In *Popular Culture and Everyday Life* Phillip Vannini and Dennis Waskul have brought together a variety of short essays that illustrate the many ways that popular culture intersects with mundane experiences of everyday life Most essays are written in a reflexive ethnographic style primarily through

observation and personal narrative to convey insights at an intimate level that will resonate with most readers. Some of the topics are so mundane they are legitimately universal: sleeping, getting dressed, going to the bathroom, etc. Others are common enough that most readers will directly identify in some way: watching television, using mobile phones, playing video games, etc. While some topics will appeal more or less depending on a reader's gender, interests, and recreational pastimes (putting on makeup, watching the Super Bowl, homemaking, etc.), this book will remind readers of their own similar experiences, provide opportunities to reflect upon them in new ways, as well as compare and contrast how experiences relayed in these pages relate to lived experiences. The essays will easily translate into rich and lively classroom discussions that shed new light on a familiar taken-for-granted everyday life, both individually and collectively. At the beginning of the book, the authors have provided a grid that shows the topics and themes that each article touches on. This book is for popular culture classes and will also be an asset in courses on the sociology of everyday life, ethnography, and social psychology.

Proceedings of the 2nd International and Interdisciplinary Conference on Image and Imagination Enrico Cicalò, 2020-03-17. This book gathers peer-reviewed papers presented at the 1st International and Interdisciplinary Conference on Image and Imagination (IMG) 2019 held in Alghero, Italy, in July 2019. Highlighting interdisciplinary and multi-disciplinary research concerning graphics, science, and education, the papers address theoretical research as well as applications including education in several fields of science, technology, and art. Mainly focusing on graphics for communication, visualization, description, and storytelling, and for learning and thought construction, the book provides architects, engineers, computer scientists, and designers with the latest advances in the field, particularly in the context of science, arts, and education.
