**The Economics of Regional Integration** Sándor Gyula Nagy, 2025-03-12 This book develops a new methodological framework for measuring the efficiency of regional integration and the integration profile of member states. It includes rich case studies which offer a comparative analysis of ten integrations spanning four continents: The Americas, the European Union, Africa, and Asia. The Economics of Regional Integration shows the importance of regional economic integration in the world economy based partially on descriptive analyses, the authors' new methodological framework, and a new composite index integration profile. It implements and quantifies relevant theories, e.g., integration maturity, competitiveness, economic development, convergence to one framework, and a composite indicator. This helps to arrive at a more precise measurement of these integrations, resulting in useful feedback for decision makers and leading to policy recommendations for each organisation to improve efficiency or to include new members. The text presents a comparative perspective of regional integration based on case studies by applying the same theoretical framework and a comprehensive methodology for assessing the economic readiness of membership-seeking countries while also considering regional differences. It investigates the impact of regional integration on income inequality and poverty reduction by examining how common development economic policies and social programs implemented by regional organizations affect the distribution of income and wealth among member states. The comprehensive investigation of regional integration covering economic, social, and institutional factors makes the book highly relevant for advanced students, researchers, and scholars. Additionally, its potential policy context application makes it useful for policymakers and practitioners participating in regional integration programs. *The Australian Banker*, 1989. *Emerging Issues in Islamic Finance Law and Practice in Malaysia* Umar A. Bell, 2003-01-01 This publication has been produced as part of a capacity building programme to strengthen the ability of national statistical systems to collect subnational demographic, socio-economic, and fiscal data. This is important in the design of public policy options, particularly as subnational governments in the transition economies of Central and Eastern Europe become responsible for the delivery of local services. This publication contains case studies from five countries in Central and Eastern Europe that are at different stages of fiscal decentralisation, covering Bulgaria, Romania, the Slovak Republic, Slovenia, and Ukraine.
