TO THE READER

This Workshop Manual has been prepared to provide servicing personnel with information on the mechanics, service and maintenance of 6100/611000. It is divided into two parts, "Mechanics" and "Overhauling and Servicing".

100

Information on the construction and location are included in this section. The part should be understood before proceeding with troubleshooting, disassembly and services.

■ **Abstract** The purpose of this study was to determine the effect of a 12-week, low-intensity, supervised walking program on the physical and psychological health of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were 40 sedentary, middle-aged women who were randomly assigned to either a supervised walking program or a control group. The walking program consisted of 12 weeks of supervised walking, 3 times per week, for 30 minutes per session. The control group consisted of 20 women who did not participate in the walking program. The subjects were assessed at baseline and at 12 weeks for physical and psychological health. The walking program had a significant positive effect on the physical and psychological health of the subjects. The walking program significantly improved the subjects' physical health, as measured by the 6-minute walk test, and their psychological health, as measured by the Beck Depression Inventory and the State-Trait Anxiety Inventory. The walking program also had a significant positive effect on the subjects' quality of life, as measured by the SF-36. The walking program was well tolerated and had no adverse effects. The results of this study suggest that a supervised walking program can be an effective intervention for improving the physical and psychological health of sedentary, middle-aged women.

Under the heading "General" comes general precautions, check and maintenance and special tools. For each action, there are troubleshooting, servicing specification lists, checking and adjusting, disassembling and assembling, and servicing which cover procedures, precautions, factory specifications and alternate tools.

All information, illustrations and specifications contained in this Manual are based on the latest available information available at the time of publication.
