Original Sin Bleddyn E. Bowen,2023-01-01 Space technology was developed to enhance the killing power of the state The Moon landings and the launch of the Space Shuttle were mere sideshows drawing public attention away from the real goal military and economic control of space as a source of power on Earth Today as Bleddyn E Bowen vividly recounts thousands of satellites work silently in the background to provide essential military intelligence and economic capabilities No major power can do without them Beyond Washington Moscow and Beijing truly global technologies have evolved from the ground floor of the nuclear missile revolution to today s orbital battlefield shaping the wars to come World powers including India Japan and Europe are fully realizing the strategic benefits of commanding Earth s cosmic coastline as a stage for war development and prestige Yet as new contenders spend more and more on outer space there is scope for

cautious optimism about the future of the Space Age if we can recognize rather than hide its original sin
