

= A LOOK AT LOGICAL FALLACIES =

ROBOTS SHOULD TAKE OVER THE WORLD!

Premise accepted. Please state your arguments.

I have met a few people, and I conclude that all humans are ugly, evil, and smell like socks.

HASTY GENERALIZATION
You have not studied enough examples for such a conclusion.

You say we should work alongside humans, but what about the human who short-circuited my friend?

RED HERRING
That is unfortunate, but it is irrelevant and distracting from the main argument.

If we act nice to humans now, soon they will demand constant back rubs.

SLIPPERY SLOPE
The first event will not necessarily lead to such an extreme result.

All humans start out as incompetent babies, so they must grow up to become incompetent adults.

GENETIC FALLACY
You cannot judge a thing based on its origins.

Robots are better leaders because of superior leadership skills.

CIRCULAR ARGUMENT
You are restating your point instead of proving it.

Where is your robot pride?

AD POPULUM
You are appealing to my emotional circuits instead of presenting facts.

Why do you hate robots so much?

STRAW MAN
You are attacking a point of view that is not my own.

The humans who make me do math for them are worse than MagmaDroid, Melter of Hand Drives!

MORAL EQUIVALENCE
Your comparison is unfair and inaccurate.

It is better to destroy the humans than let the humans destroy us.

EITHER/OR
You are oversimplifying. There are more than two possible outcomes.

Those evil humans need to be stopped!

BEGGING THE CLAIM
You must prove they are evil before using it in your argument.

I met a human, and then I began malfunctioning. Humans are to blame!

POST HOC ERGO PROPTER HOC
Just because B followed A does not mean A caused B.

I conclude you should not be debating while you are malfunctioning.

AD HOMINEM
That is attacking me and not my argument!

Logical Fallacies From Peter Goldman Answers:

Argument Types and Fallacies in Legal Argumentation Thomas Bustamante, Christian Dahlman, 2015-04-07 This book provides theoretical tools for evaluating the soundness of arguments in the context of legal argumentation. It deals with a number of general argument types and their particular use in legal argumentation. It provides detailed analyses of argument from authority, argument ad hominem, argument from ignorance, slippery slope argument, and other general argument types. Each of these argument types can be used to construct arguments that are sound as well as arguments that are unsound. To evaluate an argument correctly, one must be able to distinguish the sound instances of a certain argument type from its unsound instances. This book promotes the development of theoretical tools for this task. **Considering**

Pragma-Dialectics Peter Houtlosser, Agnes van Rees, 2014-04-04 *Considering Pragma Dialectics* honors the monumental contributions of one of the foremost international figures in current argumentation scholarship, Frans van Eemeren. The volume presents the research efforts of his colleagues and addresses how their work relates to the pragma dialectical theory of argumentation with which van Eemeren's name is so intimately connected. This tribute serves to highlight the varied approaches to the study of argumentation and is destined to inspire researchers to advance scholarship in the field far into the future. Replete with contributions from highly esteemed academics in argumentation study, chapters in this volume address such topics as Pragma dialectic versus epistemic theories of arguing and arguments, Pragma dialectics and self advocacy in physician/patient interactions, The pragma dialectical analysis of the ad hominem family, Rhetoric dialectic and the functions of argument, and The semantics of reasonableness. As an exceptional volume and a fitting tribute, this work will be of interest to all argumentation scholars considering the astute insights and scholarly legacy of Frans van Eemeren.

What are Logical Fallacies? Logical Fallacies are common errors in reasoning. It undermines the logic of the argument. Fallacies can be either illegitimate arguments or irrelevant points. Logical Fallacies are often identified because they lack evidence that supports their claim. Logical Fallacies can also be likened to having cheat codes for a video game. The cheat codes can help you to quickly beat the game. It is like having a short cut. It may be more time consuming and much more difficult to play a game without cheat codes. Similarly, as long as people don't know that you are cheating, you can be very persuasive in speech with logical fallacies. Although Logical Fallacies have faulty reasoning, it doesn't mean that it is not effective. It can actually be very effective and persuasive, especially to the untrained ear who is not familiar with Logical Fallacies. Watch out for these common fallacies in your own arguments and in the

arguments of others In this book logical fallacies and some of its examples include Slippery Slope Hasty Generalization Post Hoc Ergo Propter Hoc Genetic Fallacy Begging the Claim Circular Argument Either Or Ad Hominem Ad Populum Red Herring Straw Man Moral Equivalence

Logical Fallacies B. J. Copeland, 2019-09-26 Logical fallacies What is a Logical Fallacy Exactly All logical fallacies 34 Examples Simple Explanation The word fallacy comes from the Latin fallacia which means deception deceit trick artifice however a more specific meaning in logic a logical fallacy that dates back to the 1550s means false syllogism invalid argumentation An Error in Reasoning One of the earliest academic discussions of logical fallacies comes from the book Elementary Lessons in Logic Deductive and Inductive published by MacMillan and Co in 1872 where the modern definition of logical fallacies is used the modes in which by neglecting the rules of logic we often fall into erroneous reasoning Today this basic definition is still used and often abbreviated to just an error in reasoning It is not a factual error The Difference Between Logical Fallacies and Cognitive Biases In the early 1970s two behavioral researchers Daniel Kahneman and Amos Tversky pioneered the field of behavioral economics through their work with cognitive biases and heuristics which like logical fallacies deal with errors in reasoning The main difference however is that logical fallacies require an argument whereas cognitive biases and heuristics mental shortcuts refer to our default pattern of thinking Sometimes there is crossover Logical fallacies can be the result of a cognitive bias but having biases which we all do does not mean that we have to commit logical fallacies Consider the bandwagon effect a cognitive bias that demonstrates the tendency to believe things because many other people believe them This cognitive bias can be found in the logical fallacy appeal to popularity Everybody is doing X Therefore X must be the right thing to do The cognitive bias is the main reason we commit this fallacy However if we just started working at a soup kitchen because all of our friends were working there this wouldn't be a logical fallacy although the bandwagon effect would be behind our behavior The appeal to popularity is a fallacy because it applies to an argument I would say that more often than not cognitive biases do not lead to logical fallacies This is because cognitive biases are largely unconscious processes that bypass reason and the mere exercise of consciously evaluating an argument often causes us to counteract the bias Factual Errors are Not Logical Fallacies To illustrate this point let's consider the availability heuristic a cognitive bias that describes the tendency for one to overestimate the likelihood of more salient events usually the result of how recent the memories are or how unusual or emotionally charged they may be This bias can be demonstrated in believing that you are more likely to die in a plane crash than an automobile accident because of all the plane crashes you see in the news As a result of this bias one might argue Plane crashes kill more people than automobile accidents Therefore it is safer to drive in a car than fly in a plane This is not fallacious it's factually incorrect If it were true that plane crashes kill more people than automobile accidents the conclusion would be reasonable The argument itself does not contain flawed reasoning it contains incorrect information While we can say the reasoning behind the argument was fallacious there is no logical fallacy present in the argument Similarly if I told you that the sun was about

30 miles from the earth and the size of a football stadium I would not be committing a fallacy but I would be a moron Factual errors are not fallacies **Guides to Straight Thinking** Stuart Chase, 1956
