Contemporary Perspectives on Natural Law Dr Ana Marta González, 2012-10-01 Resorting to natural law is one way of conveying the philosophical conviction that moral norms are not merely conventional rules Accordingly the notion of natural law has a clear metaphysical dimension since it involves the recognition that human beings do not conceive themselves as sheer products of society and history And yet if natural law is to be considered the fundamental law of practical reason it must show also some intrinsic relationship to history and positive law The essays in this book examine this tension between the metaphysical and the practical and how the philosophical elaboration of natural law presents this notion as a limiting concept between metaphysics and ethics between the mutable and the immutable between is and ought and in connection with the latter even the tension between politics and eschatology as a double horizon of ethics This book contributed to by scholars from Europe and America is a major contribution to the renewed interest in natural law It provides the reader with a comprehensive overview of natural law both from a historical and a systematic point of view It ranges from the mediaeval synthesis of Aquinas through the early modern elaborations of natural law up to current discussions on the very possibility and practical relevance of natural law theory for the contemporary mind **Natural Law and Its**

Relevance Gregory J. Lapoint, 2020-08-03 An introduction to Natural Law Gregory LaPoint a business owner professor and father was born in Los Angeles and raised in Southern California He has lived most of his adult life in Colorado where his journey to explore the natural law has continued He graduated from Regis College with a bachelors degree in philosophy received a graduate certificate in civics from the University of San Diego received his first masters degree in theology awarded summa cum laude from Holy Apostles College and Seminary and a second masters degree from Holy Apostles in philosophy cum laude and he is presently a doctoral candidate The foundation for natural law in his life began as young man An awakening to common sense realism started with early family experiences and continued through life lessons Jack Peiffer his maternal grandfather had nurtured in him a pragmatic orientation with such advice as keep your nose to the grindstone and instilled an abiding quest for this common sense realism Fortuitously he spent his formative years at a boarding school called St Michaels Preparatory High School in Silverado California operated by the Norbertine Fathers of St Michaels Abbey His instructors impressed upon him an appreciation for living according to the natural law It was at St Michaels that the dedication to natural law was instilled into the fabric of his disposition Later he was formally introduced to the subject of philosophy With this early training business experience education and equipped with the tools of inferential realism Gregory

eventually committed his life and resources to advance the natural law His credentials for writing this book on natural law have emerged primarily from a steadfast commitment to observation and reasoning that are based in metaphysical realism Throughout his thirty years as a business owner Gregory consistently applied natural law to his business practices and life activities He studied natural law both formally and informally He believes that it is not necessary to have a college degree nor be a college professor nor be an author to understand and practice natural law While he does consider his advanced graduate degrees in both philosophy and theology positive sources of information these degrees remain of secondary importance Essentially it is the metaphysics of realism combined with systematic inquiry that leads to the further understanding of natural law as well as to the adversaries of natural law It has become evident to him that learning and growing in knowledge of natural law is the responsibility of every human being wherever they may reside or whatever their profession or calling might be He recognizes natural law to be the quintessential and indispensable governing human science for all cultures and human institutions Gregory LaPoint founded the Center for Natural Law to raise awareness of natural law ethics in our world today He lives in Denver Colorado where his daughter also lives When he is not teaching or giving natural law seminars he enjoys golfing and reading

Person and Natural Law Mieczysław Albert Krąpiec, 1993 *Person and Natural Law* is an important treatise on the philosophical understanding of natural law and its role in human existence In this book Professor Krąpiec explains natural law analogically and argues that an individual is capable of interpreting and understanding the natural arrangement of things of what is human good and evil It is precisely this human capacity to understand good and evil as well as the realization in one's own behaviour of the discerned good that reveals the existence of natural law within an individual and among people The individual's rational choice to do good is the analogical expression of natural law

Schmidt, 2012-12-06 Ever since philosophy became conscious of itself there has been a problem of the relations between the real world which philosophy sought to understand and explain and the thought by which it sought to explain it It was found that thought had certain requirements and conditions of its own If the real world was to be understood through thought there was a question whether thought and the real correspond ed in all respects and therefore whether they had the same conditions and laws or whether some of these were peculiar to thought alone For the solution of this problem it was necessary to study thought and the process of knowing and the conditions which the manner of know ing placed upon our interpretation of the real With a consciousness of the peculiarities of thought and of its laws philosophers could then more surely make use of it to arrive at the knowledge of the real world which they were seeking without danger of reading into the real what is peculiar to thought This necessity gave rise to the science of logic a science which is still necessary and for the same reasons It has an importance in philosophy which it is disastrous to overlook

The Tradition of Natural Law Yves René Marie Simon, 1992 The tradition of natural law is one of the foundations of Western civilization At its heart is the conviction that there is an objective and universal justice which transcends humanity s particular expressions of justice It asserts that there are certain ways of behaving which are appropriate to humanity simply by virtue of the fact that we are all human beings Recent political debates indicate that it is not a tradition that has gone unchallenged in fact the opposition is as old as the tradition itself By distinguishing between philosophy and ideology by recalling the historical adventures of natural law and by reviewing the theoretical problems involved in the doctrine Simon

clarifies much of the confusion surrounding this perennial debate. He tackles the questions raised by the application of natural law with skill and honesty as he faces the difficulties of the subject. Simon warns against undue optimism in a revival of interest in natural law and insists that the study of natural law begins with the analysis of the law of the land. He writes not as a polemicist but as a philosopher and he writes of natural law with the same force, conciseness, lucidity, and simplicity which have distinguished all his other works.
