Book Reviews *China in Space* Brian Harvey, 2013-03-27 Rockets were invented in China the home of many modern inventions including ancient astronomy and were used originally for military purposes in the 13th century The Chinese space program was founded in October 1956 by the father of Chinese rocketry Tsien Hsue Shen who lived in California in the 1930s until his expulsion as a Chinese spy In recent times there have been three manned spaceflights highlighting China's ambitious space program and generating worldwide interest Future missions are planned including a mission to go to Mars The explosive growth of China's innovative and rapidly developing space program in recent years has made it a hot topic in international space policy This follow up to Harvey's earlier book *China's Space Program From Conception To Manned Spaceflight* 2004 bring us up to date with everything that is happening in the Chinese space program today and looks at its ambitious future The author briefly summarizes how this program evolved from medieval times and uncovers the truth behind the bland unreliable and generally uninformative news releases issued around each space mission It also examines the key features of the program previously unknown to the outside world

The Persian Gulf region has a significant role in the successful implementation of BRI. Emerging strategic diplomatic and financial partnerships will enable China to control the flow of its exports to world markets. The BRI has five major goals: Policy coordination, facilities connectivity, free trade, financial integration, and people to people bonds. Facilities connectivity which focuses on transportation and energy infrastructure is the initiative's priority. The integration between the national development plans of Gulf monarchies, the economic reconstruction plans of Iraq and Iran, and the new economic goals of Saudi Arabia with China's Belt and Road vision have converged to bring forward opportunities. The implementation of the new Silk Road strategy will unleash a regional infrastructure boom by connecting China with Asia, Europe, and Africa by land and sea, boosting renminbi internationalization. Nevertheless, there are challenges that could complicate the envisaged bilateral partnerships. Saudi Arabia: The strategic synergy between the BRI and Saudi Vision 2030 has forged a joint economic development path, but external conflicts in Yemen and Iran could derail plans. Iran: While Tehran has a special geographical status in West Asia, Washington's decision to withdraw from the Iran nuclear agreement might create Sino-Iranian trade barriers. The UAE: In July 2018, bilateral relations were elevated to a comprehensive strategic partnership. The synergy between the BRI and UAE Vision 2021 is multifaceted: trade, energy infrastructure, and logistics; financial services; military ties; tourism; and cultural cooperation, but very complex. Most of the Gulf States are governed by monarchies and are at the primary stage of industrialization and are susceptible to US and European influence. The challenges China's ascendancy poses for the US and the inevitable geopolitical fight back in conjunction with Gulf regional turbulence mean that the BRI project will face substantive challenges in the years ahead. **China's Middle East Diplomacy** Dr. Mordechai Chaziza, 2020-09-10 The Peoples Republic of China (PRC) diplomatic engagement with the Middle East spans multiple dimensions including trade and investment, the energy sector, and military cooperation. Connecting China through the Suez Canal to the Mediterranean and Europe, the Middle East is a unique geostrategic location for Beijing, a critical source of energy resources, and an area of expanding economic ties. The Middle East geographical and political area is subject to

different country inclusion interpretations that have changed over time and reflect complex and multifaceted circumstances involving conflict religion ethnicity and language China considers most Arab League member countries as well as Israel Turkey and Iran as representing the Middle East The Ministry of Foreign Affairs and official Chinese publications refer to this region as Xiya beifei West Asia and North Africa China sees the Middle East as an intrinsic part of its Belt and Road Initiative BRI and has ramped up investment in the region accordingly focusing on energy including nuclear power infrastructure construction agriculture and finance This book uses the BRI as a framework for analyzing ChinaMiddle East relations with special emphasis on the PRCs strategic partnerships via regional mutual interdependency in various sectors such as energy infrastructure building political ties trade and investment financial integration people to people bonding and defense A stable Middle East region is vital for Chinas sustainable growth and continued prosperity As the worlds largest oil consumer with an ambition to expand its economic and political influence the Middle Easts geostrategic location and holder of most of the worlds known energy resources make it indispensable to the success of the Belt and Road Initiative

China's Space Program - From Conception to Manned Spaceflight Brian Harvey,2004-07-15 This book is designed for publication straight after the launch of China s first manned spacecraft The precursor mission Shenzhou flew unmanned in November 1999 in line with the predictions of The Chinese Space Programme From Conception to Future Capabilities 1998 the first edition of this retitled book China s Space Program From Conception to Manned Spaceflight builds on the 1998 title to take account of the first manned flight in October 2003 It also brings the reader up to date with other developments in the Chinese space programme over from 1998 to the manned flight and looks forward to China s future plans and ambitions
