

7 DIFFERENT TYPES OF LEARNING STYLES

When people identify the learning style that suits them best, they tend to stick with it. However, research has shown that the most effective study comes from blending different learning styles together.

VISUAL

Visual learners do well when they use symbols, boxes, charts and colours in their notes. If you find that you learn better by reading and looking at pictures, diagrams and graphs etc. the chances are you're a visual learner.

VERBAL

Techniques used by verbal learners are reciting information out loud, writing your own notes and highlighting the key points. Having a passion for words, writing, tongue twisters, rhymes, may indicate that this learning style is for you.

AURAL

Aural learning involves using sound and music. Auditory learners develop understanding and memory by hearing and listening. If you find it easier to understand spoken instructions rather than reading, aural learning will benefit you.

PHYSICAL

Physical learning involves using your body and sense of touch to learn. Physical learners learn by doing, touching, moving, building, and are described as a 'hands-on'. If you find it difficult to sit still for long periods of time, chances are you're a physical learner.

LOGICAL

Logical learners often learn by asking a lot of questions. Logical learners want to understand the whole picture. They are natural thinkers who learn by classifying, categorising and thinking abstractly about patterns & relationships etc.

SOCIAL

Social learners prefer to learn in groups rather than on their own and like generating ideas by brainstorming with others. If you like taking part in group sports and prefer social activities than doing things on your own, you may be a social learner.

SOLITARY

Solitary learners tend to be more independent and introspective, spending a lot of time on their own, enjoying their own company. If you enjoy spending time alone, keeping a journal and engaging in self-analysis to gain a deeper understanding of yourself, you may be a solitary learner.

Looking at Personality Types and Learning Styles in Second Language Acquisition Coleen K. Landheer, 2000
After Carl Jung: A Treatise Krishna Nath Pandey, Ph.D. & Prathham Arora, 2024-11-04
 This book aims to provide an overview of the works of various scholars in the fields of learning teaching and education having the point of view of harnessing mass energy in the concept of Einstein
 This entails that the education of masses in twenty first century makes it imperative to place the learning management system in perspective
 In addition to this the learning style of the leaners and the facilitators enhances the value proposition manifold
 In this process archetypal perspective of Jung comes into play in a big way
 The teacher taught relationship is of catalytic value but the education cannot be equated to the technical rationality only
 apropos Jung the tool of observation used for learning and teaching notwithstanding
 The premise that the intuitive faculties are pivotal in education has been established by Jung in an epoch making way
 Learning lessons from failures blunders and mistakes in an old phenomenon
 However Jung used it in a credible logical and scientific manner
 For the first time Jung emphasized on the education as a driver of therapies besides putting it at pinnacle where inculcating the value proportion and its interface with ethical behavior which got not the penultimate position
