**Criminal Poisoning** John H. Trestrail, 2000-01-31 Poison often makes fools of clever men sometimes even makes clever men of fools La Rochefoucauld This book represents a pioneering work dealing exclusively with poisons in the hands of the murderer tamperer and terrorist One of the oldest offensive killing weapons developed by humanity after the stick stone and fist were the poisons Yet after nearly 5000 years of recorded history no in depth work has ever been produced dealing exclusively with poisons as weapons for homicide The author's review of the international literature has revealed only a few scattered scientific papers dealing with the psychology of the poisoner and books on medical jurisprudence and forensic investigation have devoted only a few pages to this important subject usually stating that it is a rare occurrence How do we know the true rarity of the use of poisons for homicide All one has to do is look at the number of poisonings that are first documented only after the exhumation of the deceased to raise the logical question If we missed this one how many more have been missed If all those buried in our cemeteries who had been poisoned could raise their hands we would probably be aghast at the numbers For years the homicidal poisoner has remained shrouded in mystery      **Information**
