Zernicke, David Arthur Hart, Humans evolved to be mobile within the boundary conditions of Earth and many biological and physiologic systems depend on mechanical loading to maintain integrity during growth and maturation during skeletal maturity and during the aging process These systems subscribe to the use it or lose it principle and thus require continual use to maintain integrity Given that premise considerable basic and clinical research efforts have been directed at optimizing the effectiveness and positive impact of exercise on sports performance and the well being of those with intact systems However those with disabilities or compromised abilities also benefit from exercise protocols and there exists a need to focus attention on these populations as well Given the myriad of biological and physiological systems that benefit from exercise and mechanical loading there is a need for all humans of varying abilities to not only maintain the integrity of their health but to attempt to optimize it recognizing that optimizing each person's health across the stages of the life cycle may require different exercise protocols dependent on stage of life sex genetics and other individualized variables For those with physical disabilities embracing and maintaining such exercise protocols may be challenging but expanded research translation of findings and integration of the outcomes into everyday life to enhance the health and well being of this significant population are needed going forward American Vision, Unit 9 Resources McGraw-Hill Staff, 2002-05 *America Pathways to the Present*, 1995 **EcCentric Visions** Gaile McGregor, 2006-01-01 What this book represents is quite literally a slice of white Australian life By noting the patterns and parallels that emerge in a random sampling of social phenomena of widely varying types from soap operas to political behaviour Gaile McGregor has constructed a model that in its challenge to uniformitarianism is a test case in ethnographic

theory Using methods ranging from the hermeneutic through the structuralist to the psychoanalytic McGregor deploys the self evidence of communal life and language to establish not only that all cultural phenomena are patterned but that this patterning is unique to and consistent across the entire system Further it not only influences but constrains the way the Australian conceptualizes codifies and expresses his her existential position Hence the Australian predilection for icons of intermediacy the verandah in architecture the bush in literature the beach in folk culture the middle ground in landscape painting the pub in everyday life This identification with buffer zones between inside and outside not only mimics the Australian s real bracketing between desert and ocean but embodies his her sense of disablement vis vis both culture and nature art and techne super ego and id all of which are coded as feminine Quill & Quire ,1990 *Congressional Record* United States. The American Crisis in Physical Activity Education F. Zeigler Earle F. Zeigler,Earle F. Zeigler,2010 The American Crisis in Physical Activity Education was written because the author is terribly upset about what is happening to physical activity education and so called educational sport within the education system He lives in North America as a dual citizen and he feels sad that we appear to be a large part of the world s problem He thought that the world would be a better place for all people by the year 2000 Because now it definitely doesn t seem to be heading in that direction he is forced to conclude 1 that in many ways we are confused about what our values are at the present 2 that we need to reconsider them and then re state exactly what we believe they are in light of the changing times and 3 finally that we will then need to assess more carefully on a regular basis whether we are living up to those values we have chosen and so often glibly espouse Physical activity education including what is called educational sport is a field that in the 21st century is facing one more crossroad in its torturous historical development
