History Communications Intelligence During World:

A History of US Communications Intelligence During WWII Robert Louis Benson, Center for Cryptologic History, 2011-01-01 With the onset of World War II the American organizations responsible for the vital wartime function of communications intelligence COMINT were forced to change drastically In addition to the daunting challenges of rapid operational expansion the peacetime processes of U S Army and Navy COMINT proved inadequate to support active military operations on a worldwide scale With national survival and individual lives at stake more information and its timely dissemination to both U S forces and those of its close ally the United Kingdom quickly became a top priority A History of U S Communications Intelligence during World War II Policy and Administration tells the story of the profound organizational changes wrought on U S COMINT by rapid expansion urgent requirements for information and international agreements While the services never completely solved the problems posed by these challenges by war s end they had created structures and implemented policies which however cumbersome achieved high levels of combat support After covering the initial year of expansion this study examines such issues as The Army British COMINT agreement of 1943 and the ENIGMA crisis British U S Navy COMINT agreements in 1943 and 1944 Jurisdictional problems regarding clandestine communications Army and Navy movement to full cooperation 1944 1945 Internal organizational developments in the Army and Navy In addition to this comprehensive cover of organizational issues A History of U S Communications Intelligence during World War II also sheds new light on the U S UK controversy over U S denial of Alan Turing s access to scrambler technology developed at Bell Labs conflicts between the Director of Naval Intelligence and J Edgar Hoover s FBI over sharing intelligence information and the tension between Army and Navy COMINT and the OSS which had its own methods of obtaining data from British intelligence sources Scholars and intelligence professionals alike will find much of value in this detailed and copiously documented study

A History of U.S. Communications Intelligence During World War II Robert Louis Benson, 1997 A study of high level policy administration and organization of COMINT during WWII and how it was controlled and directed by each military service and how these services related to each other and to their British counterparts Resource description page [A History of U.S. Communications Intelligence During World War II](#) National Security Agency, 2015-05-07 The objective of this study is to provide an authentic and reliable guide to U S communications intelligence COMINT during World War 11 A complete history of this subject would be an overwhelming task therefore I have limited this effort to matters of high level policy administration and organization I have tried to show how communications intelligence was controlled and directed by each service and how these services related to each other and to their British counterparts This is not a history of cryptanalysis or COMINT operations nor is there much here about the specific uses made of COMINT Nevertheless within these limits I have tried to be complete That is I have made an effort to show not only how Army and Navy COMINT activities were run but also how COMINT was structured in the Coast Guard FBI and Federal Communications Commission FCC There

is also a great deal here on the non COMINT producing agencies the Military Intelligence Service MIS and the Office of Naval Intelligence QONI In fact my account as it relates to the Army has more to do with the MIS than with Arlington Hall I hope the reasons for this will be made clear in the text Much of this study seems to be concerned with service politics and interservice disagreements I can only say that I recognize that COMINT was often produced in spite of certain high level maneuverings On that same theme I also recognize that the people who produced the real COMINT product are in this study quite secondary figures There is little here about Frank Rowlett Solomon Kullback or Frank Raven A word about the British This study could almost be subtitled The Development of a COMINT Alliance The emphasis on British intelligence is an absolute must for a policy and administrative history because there is no understanding of the development of U S COMINT without continually reporting and examining the role of the British The sources used in this study are adequately identified in the footnotes and the sources section I have used the footnotes to report a great deal of supplementary information and I hope that the reader will turn to them

Intelligence Agencies, Technology and Knowledge Production Rüdiger Bergien, Debora Gerstenberger, Constantin Goshler, 2022-02-17 This volume examines intelligence services since 1945 in their role as knowledge producers Intelligence agencies are producers and providers of arcane information However little is known about the social cultural and material dimensions of their knowledge production processing and distribution This volume starts from the assumption that during the Cold War these core activities of information services underwent decisive changes of which scientization and computerisation are essential With a focus on the emerging alliances between intelligence agencies science and computer technology the chapters empirically explore these transformations and are characterised by innovative combinations of intelligence history with theoretical considerations from the history of science and technology and the

history of knowledge At the same time the book challenges the bipolarity of Cold War history in general and of intelligence history in particular in favour of comparative and transnational perspectives The focus is not only the Soviet Union and the United States but also Poland Turkey the two German states and Brazil This approach reveals surprising commonalities across systems time and again the expansion and use of intelligence knowledge came up against the limits that resulted from intelligence culture itself The book enriches our global understanding of knowledge of the state and contributes to a historical framework for the past decade of debates about the societal consequences of intelligence data processing This book will be of much interest to students of intelligence studies science and technology studies security studies and International Relations
