Guide Of Nepali Mathematics For Class 9:

A Guide to the Literature on Semirings and their Applications in Mathematics and Information Sciences K.

Glazek, 2013-06-29 This volume presents a short guide to the extensive literature concerning semirings along with a complete bibliography. The literature has been created over many years in variety of languages by authors representing different schools of mathematics and working in various related fields. In many instances the terminology used is not universal which further compounds the difficulty of locating pertinent sources even in this age of the Internet and electronic dissemination of research results. So far there has been no single reference that could guide the interested scholar or student to the relevant publications. This book is an attempt to fill this gap. My interest in the theory of semirings began in the early sixties when together with Bogdan W. Głogorz I tried to investigate some algebraic aspects of compactifications of topological spaces, semirings of semicontinuous functions and the general ideal theory for special semirings. Unfortunately local algebraists in Poland told me at that time that there was nothing interesting in investigating semiring theory because ring theory was still being developed. However some time later we became aware of some similar investigations having already been done. The theory of semirings has remained my first love ever since and I have been interested in the results in this field that have been appearing in literature even though I have not been active in this area myself. Globalization and

Living Together D.B. Rao, 2005 Education is gearing towards preparing individuals to live in together since ancient times. However the nation of Learning to Live Together is clearly shaped only very recently by the UNESCO's International Commission on Education for the Twenty first Century. The Commission emphasised that education for the 21st century based on four pillars namely Learning to know, Learning to do, Learning to be and Learning to live together. The first three pillars are essential for the sound development of persons, communities or individual nations but the fourth pillar, learning to live together, is of a different, more global nature. Its omission may result in the annihilation of all other educational, cultural, health and developmental efforts through war, terrorism, deterioration of resources, pandemics etc. *Gender Trouble*

Makers Jennifer Rothchild, 2007-05-07 International development efforts aimed at improving girls' lives and education have been well intended, somewhat effective but ultimately short sighted and incomplete. This is because international development efforts often operate under a reductive understanding of the term gender and how it influences the lives of girls and boys. Gender is more commonly conceived by international efforts as characteristics which are ascribed to girls as norms for behaviour. In particular the analysis in *Gender Trouble Makers* focuses on the social constructions of gender and the ways in which gender was reinforced and maintained through a case study in rural Nepal. In developing countries like Nepal promoting access to and participation in existing formal education programme is clearly necessary but it is not in itself sufficient to transform gender power relations in the broader society. When gender is properly addressed as a process then all stakeholders involved, researchers, governmental officials and community members can begin to understand and devise
