A User's Guide to the Crisis of Civilization Nafeez Mosaddeq Ahmed, 2010-08-06 It often seems that different crises are competing to devastate civilisation This book argues that financial meltdown dwindling oil reserves terrorism and food shortages need to be considered as part of the same ailing system Most accounts of our contemporary global crises focus on one area such as climate change or the threat of terrorism to the exclusion of others Nafeez Mosaddeq Ahmed argues that the unwillingness of experts to consider crises from an interdisciplinary perspective has resulted in their failure to understand historical events From ecology and the environment to political governance the global economy and international relations Ahmed investigates contemporary crises not as isolated events but as trends and processes that belong to a single global system Ahmed posits that we are therefore not dealing with a clash of civilisations as Samuel P Huntington argued Rather we are dealing with a fundamental crisis of civilisation itself

Prophets and Photons Benjamin E Zeller, 2010-03-01 This in depth study shows how new religious movements offer a variety of strategies for reconciling science and religious faith By the twentieth century established religious traditions were forced to grapple with the challenges presented by scientific knowledge and innovation But emerging religions still led by a living founder to guide them found new ways to respond to science The Hare Krishnas the Unification Church and Heaven's Gate each found distinct ways to incorporate major findings of modern American science understanding it as central to their wider theological and social agendas In *Prophets and Photons* Benjamin Zeller examines how these New Religious Movements NRMs crafted their views on science during their founding period and how those views evolved over time These NRMs shed light on how religious groups new old alternative or mainstream could respond to the tremendous growth of power and prestige of science in late twentieth century America In this engrossing book Zeller carefully shows that religious groups had several methods of creatively responding to science and that the often assumed conflict based model of science vs religion must be replaced by a more nuanced understanding of how religions operate in our modern scientific world

Happiness by Design Justus Nieland, 2020-02-18 A cultural history of modern lifestyle viewed through film and multimedia experiments of midcentury designers Charles and Ray Eames For the designers Charles and Ray Eames happiness was both a technical and ideological problem central to the future of liberal democracy Being happy demanded new things but also a vanguard life in media that the Eameses modeled as they brought film into their design practice Midcentury modernism is often considered institutionalized but *Happiness by Design* casts Eames era designers as innovative media artists technophilic humanists change managers and neglected film theorists *Happiness by Design* offers a fresh cultural history of midcentury modernism through the film and multimedia experiments of Charles and Ray Eames and their peers Will Burtin László Moholy-Nagy and György Kepes among others at a moment when designers enjoyed a new cultural prestige Justus Nieland traces how as

representatives of the American Century's exuberant material culture Cold War designers engaged in creative activities that spanned disciplines and blended art and technoscience while reckoning with the environmental reach of media at the dawn of the information age Eames era modernism Nieland shows fueled novel techniques of culture administration spawning new partnerships between cultural and educational institutions corporations and the state From the studio showroom floor or classroom to the stages of world fairs and international conferences the midcentury multimedia experiments of Charles and Ray Eames and their circle became key to a liberal democratic lifestyle and also anticipated the look and feel of our networked present *Journal of Health, Physical Education, Recreation*, 1943 **Christians and the Color Line** J. Russell Hawkins, Philip Luke Sinitiere, 2014 The essays in *Christians and the Color Line* complicate the research findings of Emerson and Smith's *Divided by Faith* 2000 and explore new areas of research that have opened in the years since its publication

Paint by Number William L. Bird, 2001-03 The how to craze that swept the nation Cover subtitle **Essays in a Pluralistic Art World** Arthur C. Danto, 2001-09-04 Danto writes about the contemporary art to be seen in museums and galleries placing it in the context of the history of modern art and of current debates about essential ideas in our society

Eisenhower Jim Newton, 2012-10-02 Newly discovered and declassified documents make for a surprising and revealing portrait of the president we thought we knew America's thirty fourth president was belittled by his critics as the babysitter in chief This new look reveals how wrong they were Dwight Eisenhower was bequeathed the atomic bomb and refused to use it He ground down Joseph McCarthy and McCarthyism until both became as he said McCarthywasm He stimulated the economy to lift it from recession built an interstate highway system turned an 8 billion deficit in 1953 into a 500 million surplus in 1960 Ike was the last President until Bill Clinton to leave his country in the black The President Eisenhower of popular imagination is a benign figure armed with a putter a winning smile and little else The Eisenhower of veteran journalist Jim Newton's rendering is shrewd sentimental and tempestuous He mourned the death of his first son and doted on his grandchildren but could one aide recalled peel the varnish off a desk with his temper Mocked as shallow and inarticulate he was in fact a meticulous manager Admired as a general he was a champion of peace In Korea and Vietnam in Quemoy and Berlin his generals urged him to wage nuclear war Time and again he considered the idea and rejected it And it was Eisenhower who appointed the liberal justices Earl Warren and William Brennan and who then called in the military to enforce desegregation in the schools Rare interviews newly discovered records and fresh insights undergird this gripping and timely narrative *U.S. Television News and Cold War Propaganda, 1947-1960* Nancy Bernhard, 1999 How US government and media collaborated in their dissemination of Cold War propaganda **Rock Star** David R. Shumway, 2014-09-15 The nature and meaning of rock stardom celebrities who embody the most important social and cultural conflicts of their era All stars are celebrities but not all celebrities are stars states David Shumway in the introduction to *Rock Star* an informal history of rock stardom This deceptively simple statement belies the complex definition

and meaning of stardom and more specifically of rock icons Shumway looks at the careers and cultural legacies of seven rock stars in the context of popular music and culture Elvis Presley James Brown Bob Dylan the Rolling Stones the Grateful Dead Joni Mitchell and Bruce Springsteen Granted there are many more names that fall into the rock icon category and that might rightfully appear on this list Partly that is the point rock star is a familiar and desired category but also a contested one Shumway investigates the rock star as a particular kind of cultural construction different from mere celebrity After the golden age of moviemaking media exposure allowed rock stars more political sway than Hollywood's studio stars and rock stars gradually replaced movie stars as key cultural heroes Because of changes in American society and the media industries rock stars have become much more explicitly political figures than were the stars of Hollywood's studio era Rock stars moreover are icons of change though not always progressive whose public personas read like texts produced collaboratively by the performers themselves their managers and record companies These stars thrive in a variety of media including recorded music concert performance dress staging cover art films television video print and others Filled with memorable photographs Rock Star will appeal to anyone interested in modern American popular culture or music history **Studies in Intelligence**, 2000 Journalism's Roving Eye John Maxwell Hamilton, 2011-08-15 In all of journalism nowhere are the stakes higher than in foreign news gathering For media owners it is the most difficult type of reporting to finance for editors the hardest to oversee Correspondents roaming large swaths of the planet must acquire expertise that home based reporters take for granted facility with the local language for instance or an understanding of local cultures Adding further to the challenges they must put news of the world in context for an audience with little experience and often limited interest in foreign affairs a task made all the more daunting because of the consequence to national security In Journalism's Roving Eye John Maxwell Hamilton a historian and former foreign correspondent provides a sweeping and definitive history of American foreign news reporting from its inception to the present day and chronicles the economic and technological advances that have influenced overseas coverage as well as the cavalcade of colorful personalities who shaped readers' perceptions of the world across two centuries From the colonial era when newspaper printers hustled down to wharfs to collect mail and periodicals from incoming ships to the ongoing multimedia press coverage of the Iraq War Hamilton explores journalism's constant and not always successful efforts at dishing the foreign news as James Gordon Bennett put it in the mid nineteenth century to describe his approach in the New York Herald He details the highly partisan coverage of the French Revolution the early emergence of special correspondents and the challenges of organizing their efforts the profound impact of the non yellow press in the run up to the Spanish American War the increasingly sophisticated machinery of propaganda and censorship that surfaced during World War I and the golden age of foreign correspondence during the interwar period when outlets for foreign news swelled and a large number of experienced independent journalists circled the globe From the Nazis' intimidation of reporters to the ways in which American popular opinion shaped coverage of Communist revolution and the

Vietnam War Hamilton covers every aspect of delivering foreign news to American doorsteps Along the way Hamilton singles out a fascinating cast of characters among them Victor Lawson the overlooked proprietor of the Chicago Daily News who pioneered the concept of a foreign news service geared to American interests Henry Morton Stanley one of the first reporters to generate news on his own with his 1871 expedition to East Africa to find Livingstone and Jack Belden a forgotten brooding figure who exemplified the best in combat reporting Hamilton details the experiences of correspondents editors owners publishers and network executives as well as the political leaders who made the news and the technicians who invented ways to transmit it Their stories bring the narrative to life in arresting detail and make this an indispensable book for anyone wanting to understand the evolution of foreign news gathering Amid the steep drop in the number of correspondents stationed abroad and the recent decline of the newspaper industry many fear that foreign reporting will soon no longer exist But as Hamilton shows in this magisterial work traditional correspondence survives alongside a new type of reporting Journalism s Roving Eye offers a keen understanding of the vicissitudes in foreign news an understanding imperative to better seeing what lies ahead

Oral History and the Environment Stephen M. Sloan, Mark Cave, 2022 As uncontrolled development forces crises in the natural world deeply ingrained human connections with the earth are changing Oral history s proven ability to explore issues of race ethnicity class gender and sexuality make it a uniquely effective methodology for bringing in new perspectives to our understanding of environments This book brings together interviews with a global range of activists farmers water system managers victims of catastrophe tribal trustees wilderness rangers reindeer herders and foresters among others whose life experience gives them special insights into human environmental interaction and adaption Commentary by oral historians examines how these stories can be used to better understand our relationship with the natural world Oral History and the Environment takes what could seem broad and impersonal forces such as climate change and environmentalism and crystalizes their meaning through personal stories It overturns narrow historical frameworks bounded artificially by national borders and instead portrays the issues facing our common ecosystems
