Assembling a Collaborative Project Team Dale Sinclair, 2019-07-25 Contemporary construction practice presents a shift in emphasis from thinking about the design team in isolation to considering the project team as a collaborative whole client design team and contractor This approach requires greater consideration of how the project team is procured and assembled and Assembling a Collaborative Project Team provides a range of in depth and invaluable methods for ensuring that this essential task is carried out effectively It will bring a range of benefits to any project from facilitating BIM ready teams to better construction programming and reducing risk through ensuring a watertight contractual framework Many of the methods presented here are likely to become ingrained in the way all projects are coordinated It shows that the best way of assembling a collaborative team is by establishing the team at the outset in manner that ensures that each party is fully aware of what they need to do and when and by agreeing how this will be achieved **BIM for Construction Health and Safety** Stefan Mordue, Roland Finch, 2019-08-13 What is BIM and how does it affect the health and safety professional How are BIM technologies used on a practical level What opportunities are there for the use of BIM in the health and safety arena This concise and practical guide aims to answer all these questions and more The health and safety role is evolving towards collaboration structured data and sharing of information as BIM the incarnation of these sensibilities increasingly underpins construction practice As the industry begins to see how these two topics can and should intersect this guide provides context and practical advice by explaining the basic principles of BIM how it will shape the health and safety professional's role and what tools and processes will need to be embedded in the future It also highlights the wealth of opportunities that BIM provides to improve health and safety standards and effective coordination the means to exploit the potential of BIM
