Guide To Transforming Teaching Through Self Inquiry:

Guide to Transforming Teaching Through Self-Inquiry James Pelech, 2013-07-01 In the past twenty years the importance of reflection has been recognized by all professions especially the education profession In the field of education terms and practices such as reflective practice action research journaling collaborative observation professional development peer observation and professional portfolios have become organizing units of discussion and practice This book extends knowledge in the field not just by providing prompts and examples of things to do but also by presenting an organized and cohesive system consisting of definitions principles and guidelines that can be used for all reflective practice activities This system blends ideas and concepts from phenomenology the Constructivist philosophy experiential learning critical reflection theories on turning knowledge into action and transformative learning Moreover the book creates a logical system for reflective practice that provides a foundation for a framework that organizes teacher transformation through reflection This system is anchored by the practical examples provided thus making this book practical for all those interested in improving student learning The strength of this book is that it is not a recipe type publication rather it is a cohesive system which creates a rationale for the system presents the system and provides many examples The intended audience includes practitioners teacher educators teacher candidates and administrators

Integrating the Curriculum Through Active Processing James Pelech, 2025-05-30 The purpose of the book is to present a different perspective on curricular theory This book extends knowledge in the Education fields of Curricular Theory and Learning it does this by directly blending the concepts of Active Processing and the Integrated Curriculum

Dignity of the Calling Andrew T. Kemp, 2018-10-01 The purpose of this Dignity of the Calling is to share other stories of faculty entry into higher education These stories focus on the deeply personal nature of the new academic Framed around the idea of curriculum being contextual and how life experience guides what we do this collection of memoirs recollections and personal narratives allows the reader to share these lived experiences Although I was a teacher prior to the entering the professoriate I was not ready for the gargantuan professional and personal transition to higher education I was not prepared for minutiae of forms deadlines of inter office programs personalities and most of all for the human and sometimes illogical relationships among colleagues I was caught offguard by the nuanced thinking of students and most of all I was at times overwhelmed by the time constraints of research teaching and service on me and my family However I survived and I believe I thrived in in my small slice of the academic world

Student-Centered Research James Pelech, 2021-06-01 Teachers increasingly are being charged to conduct research on teaching and learning in their classes Action research is an instrument that teachers can use for their particular classroom to meet this charge While traditional research provides effective guidelines for teaching and learning its generalized format does not take into consideration the multitude of variables that affect individual classrooms and students Action research enables the teacher to improve the learning of the students in their particular context this in turn improves the professional

practice of the teacher The uniqueness of the model presented in this book is that this model is guided by specific constructivist principles These principles are then transformed into learning strategies and applied to the action research cycle Each stage of the action research process also is steered by prompts emanating from the constructivist philosophy The prompts provide questions that the teacher can use to examine current practices and consider new approaches The blending of constructivism and action research enables the teacher to create a new cognitive framework for understanding and enhancing student learning This book provides a guide for combining two important traditions resulting in a research platform which creates new knowledge about both students and teachers

Reclaiming Wisdom: Transforming Education for a Conscious Future Aindrila Ghosal, 2025-03-04 Is our education system truly preparing students for the future or is it simply mass producing workers trapped in outdated frameworks For centuries India's education system was rooted in wisdom inquiry and holistic learning The Gurukul model nurtured critical thinking self awareness and deep intellectual exploration But colonial rule replaced it with a rigid factory like system one that rewards memorization over mastery compliance over curiosity and information over true understanding Now in the age of Artificial Intelligence where machines can store analyze and create faster than ever the question becomes urgent what is the real purpose of education If knowledge is no longer exclusive to human minds what must we teach and how In *Reclaiming Wisdom: Transforming Education for a Conscious Future* Aindrila Ghosal an educator with 15 years of experience across teaching counseling and academic leadership examines why modern education is failing and how we can revive learning through India's ancient intellectual traditions Drawing from the philosophies of Swami Vivekananda Rabindranath Tagore and G I Gurdjieff she argues that education must go beyond rote learning and career preparation it must be a path to awakening the whole individual This book is a call to action for teachers parents and changemakers If education is to remain relevant in an AI driven world we must reclaim the depth of our traditions rethink the way we teach and redefine what it truly means to learn

Leading Educational Change Wisely Christopher M. Branson, 2010-01-01 Despite over 40 years of research and writing about how to lead educational change we still can t get it right Although we keep fine tuning our present ways we are yet to come up with an approach that enables educational change to happen successfully and sustainably Although this book acknowledges the importance of learning from our past it also highlights a key deficiency that has consistently compromised these efforts To date our approach to leading educational change has mainly focussed on trying to come up with the perfect practical strategy or plan In contrast this book argues that leading educational change successfully is not about following a clearly defined process like following a recipe but it is an improvisational art more like driving down a busy main street during peak hour traffic The successful leadership of educational change is an improvisational art because although the leader needs to have an overarching strategy a guiding plan what they actually do from moment to moment cannot be scripted The leader has to move back and forth from their plan to the reality currently being experienced so that the plan is being achieved but any adverse effects on those involved are being empathically and immediately attended to as well This approach to the leadership of educational change emphasises the need of the leader to be able to cope with the unforeseen the unexpected and the idiosyncratic Moreover this approach to the leadership of educational change emphasises

the relational as well as the rational requirements While such views might be familiar to many what is new and unique about this book is that it describes how it all can be achieved It provides clear research supported guidance for those who wish to finally lead successful and sustainable educational change *International Handbook of Self-Study of Teaching and Teacher Education Practices* J. John Loughran, Mary Lynn Hamilton, Vicki Kubler LaBoskey, Tom L. Russell, 2007-07-03 The International Handbook on Self study of Teaching and Teacher Education Practices is of interest to teacher educators teacher researchers and practitioner researchers This volume offers an encyclopaedic review of the field of self study examines in detail self study in a range of teaching and teacher education contexts outlines a full understanding of the nature and development of self study explores the development of a professional knowledge base for teaching through self study purposefully represents self study through research and practice illustrates examples of self study in teaching and teacher education *Self-Directed Learning for the 21st Century: Implications for Higher Education* Elsa Mentz, Josef de Beer, Roxanne Bailey, Per B. Bergamin, Chantelle Bosch, Adri du Toit, Roelien Goede, Aubrey Golightly, David W. Johnson, Roger T. Johnson, Corné Kruger, Dorothy Laubscher, Anita Lubbe, Jako Olivier, Christo van der Westhuizen, Sukie van Zyl, 2019-12-12 This book is devoted to scholarship in the field of self directed learning in the 21st century with specific reference to higher education The target audience of the book includes scholars in the field of self directed learning and higher education The book contributes to the discourse on the quality of education in the 21st century and adds to the body of scholarship in terms of self directed learning and specifically its role in higher education Although all the chapters in the book directly address self directed learning the different foci and viewpoints raised make the book a rich knowledge bank of work on self directed learning
