Is There Any Way To Read Text Messages Online:

Finding Your Online Voice J. Michael Spector, 2007 Publisher description **Improving Reading Comprehension with Online Text Visualization Tools** Rūta Kalmane, 2012-06-30 Online text visualization tools are a recent phenomenon on the World Wide Web. The potential of these tools to improve reading comprehension has not yet been empirically researched. Therefore, this book investigates if online text visualization tools can help to improve reading comprehension. In the empirical research, a quasi-experimental method was applied. The data were collected via tests distributed among the students of an experimental group and a control group. The results of the tests show that both groups improved during the practice on the same topic. However, the students of the experimental group who had training with the tools improved more than the students of the control group. According to the results, the use of text visualization tools helped the students of the experimental group to improve their reading comprehension.

Assessing Students' Digital Reading Performance Jie HU, 2022-12-30 This book provides a systematic study of the Programme for International Student Assessment (PISA) based on big data analysis, aiming to examine the contextual factors relevant to students' digital reading performance. The author first introduces the research landscape of educational data mining (EDM) and reviews the PISA framework since its launch and how it has become an important metric to assess the knowledge and skills of students from across the globe. With a focus on methodology and its applications, the book explores extant scholarship on the dynamic model of educational effectiveness, multi-level factors of digital reading performance, and the application of EDM approaches. The core chapter on the methodology examines machine learning algorithms, hierarchical linear modeling, mediation analysis, and data extraction and processing for the PISA dataset. The findings give insights into the influencing factors of students' digital reading performance, allowing for further investigations on improving students' digital reading literacy and more attention to the advancement of education effectiveness. The book will appeal to scholars, professionals, and policymakers interested in reading education, educational data mining, educational technology, and PISA, as well as students learning how to utilize machine learning algorithms in examining the mass global database.

Digital Literacies Colin Lankshear, Michele Knobel, 2008 This book brings together a group of internationally reputed authors in the field of digital literacy. Their essays explore a diverse range of the concepts, policies, and practices of digital literacy and discuss how digital literacy is related to similar ideas: information literacy, computer literacy, media literacy, functional literacy, and digital competence. It is argued that in light of this diversity and complexity, it is useful to think of digital literacies, the plural, as well as the singular. The first part of the book presents a rich mix of conceptual and policy perspectives; in the second part, contributors explore social practices of digital remixing, blogging, online trading, and social networking and consider some legal issues associated with digital media.

Language Online David Barton, Carmen Lee, 2013-04-17 In *Language Online*, David Barton and Carmen Lee investigate the impact of the online world on the study of language. The effects of language use in the digital world can be seen in every aspect of language study and

new ways of researching the field are needed In this book the authors look at language online from a variety of perspectives providing a solid theoretical grounding an outline of key concepts and practical guidance on doing research Chapters cover topical issues including the relation between online language and multilingualism identity education and multimodality then conclude by looking at how to carry out research into online language use Throughout the book many examples are given from a variety of digital platforms and a number of different languages including Chinese and English Written in a clear and accessible style this is a vital read for anyone new to studying online language and an essential textbook for undergraduates and postgraduates working in the areas of new media literacy and multimodality within language and linguistics courses
