**Islam, Science, and the Challenge of History** Ahmad Dallal, 2010-05-18 In this wide ranging and masterly work Ahmad Dallal examines the significance of scientific knowledge and situates the culture of science in relation to other cultural forces in Muslim societies He traces the ways the realms of scientific knowledge and religious authority were delineated historically For example the emergence of new mathematical methods revealed that many mosques built in the early period of Islamic expansion were misaligned relative to the Ka ba in Mecca this misalignment was critical because Muslims must face Mecca during their five daily prayers The realization of a discrepancy between tradition and science often led to demolition and rebuilding and most important to questioning whether scientific knowledge should take precedence over religious authority in a matter where their realms clearly overlapped Page 2 of cover *Science and Religion Around the World* John Hedley Brooke, Ronald L. Numbers, 2011-01-11 The past quarter century has seen an explosion of interest in the history of science and religion But all too often the scholars writing it have focused their attention almost exclusively on the Christian experience with only passing reference to other traditions of both science and faith At a time when religious ignorance and misunderstanding have lethal consequences such provincialism must be avoided and in this pioneering effort to explore the historical relations of what we now call science and religion the authors go beyond the Abrahamic traditions to examine the way nature has been understood and manipulated in regions as diverse as ancient China India and sub Saharan Africa *Science and Religion around the World* also provides authoritative discussions of science in Judaism Christianity and Islam as well as an exploration of the relationship between science and the loss of religious beliefs The narratives included in this book demonstrate the value of plural perspectives and of the importance of location for the construction and perception of science religion relations

**A Way of Life** Judith Farquhar, 2020-03-17 A short and thoughtful introduction to traditional Chinese medicine that looks beyond the conventional boundaries of Western modernism and biomedical science Traditional Chinese medicine is often viewed as mystical or superstitious with outcomes requiring na ve faith Judith Farquhar drawing on her hard won knowledge of social intellectual and clinical spheres in today s China here offers a concise and nuanced treatment that addresses enduring and troublesome ontological epistemological and ethical questions In this work which is based on her 2017 Terry Lectures *Reality Reason and Action In and Beyond Chinese Medicine* she considers how the modern rationalized and scientific field of traditional Chinese medicine constructs its very real objects bodies symptoms drugs how experts think through and sort out pathology and health yinyang right qi wrong qi stasis flow and how contemporary doctors act responsibly to seek out the root of bodily disorder Through this refined investigation East West contrasts collapse and systematic Chinese medicine no longer a mystery or a pseudo science can become a philosophical ally and a rich resource for a more capacious science

**Life After Faith** Philip Kitcher, 2014-01-01 Offers a positive argument for secularism as a way of providing for human needs and giving meaning to people s lives thus filling the role of religion and offers a vision for

successors to religion      **Captive Gods** Kwame Anthony Appiah, 2025-10-07 Philosopher Kwame Anthony Appiah explores how early social scientists developed our modern understandings of society through their theories of religion. The foundations of modern social science were built on the study of religion; the acclaimed thinker Kwame Anthony Appiah argues. Delving into the intellectual currents of the nineteenth and early twentieth centuries, he investigates how formative thinkers notably Edward Burnett Tylor, Emile Durkheim, Georg Simmel, and Max Weber grappled with the concepts of society and religion as interdependent categories. Appiah shows how their efforts to define religion or evade the task mark the power and limitations of social thought in ways that persist among theorists today. Religion was not merely an object of study but a framework through which early social scientists established sociology as a discipline. Appiah also examines more recent work in both interpretive sociology and evolutionary and cognitive psychology about the mechanisms through which communities form beliefs and values while underscoring the enduring significance of these earlier debates for contemporary social thought. Throughout, he intertwines storytelling, historical analysis, and philosophical reflection to show how our ideas about society and culture have been and continue to be forged in dialogue with religious questions      **Against Dharma** Wendy Doniger, 2018-03-20 An esteemed scholar of Hinduism presents a groundbreaking interpretation of ancient Indian texts and their historic influence on subversive resistance. Ancient Hindu texts speak of the three aims of human life: dharma, artha, and kama. Translated, these might be called religion, politics, and pleasure, and each is held to be an essential requirement of a full life. Balance among the three is a goal not always met; however, dharma has historically taken precedence over the other two qualities in Hindu life. Here, historian of religions Wendy Doniger offers a spirited and close reading of ancient Indian writings, unpacking a long but unrecognized history of opposition against dharma. Doniger argues that scientific disciplines, the shastras, have offered lively and continuous criticism of dharma or religion over many centuries. She chronicles the tradition of veiled subversion, uncovers connections to key moments of resistance, and voices of dissent throughout Indian history, and offers insights into the Indian theocracy's subversion of science by religion today      **The Scientific Buddha** Donald S. Lopez, 2012-09-25 How Western notions of the Buddha have come to misrepresent his teachings and the traditional goals of Buddhist practice      **A Bridge to the Sky** Claire D. Anderson, 2024 A Caliphal Daedalus examines connections between science and visual culture during the early Islamic scientific revolution of the caliphal age 650-1250 CE. It takes as its point of departure the figure of Abbas Ibn Firnas, d. 887, the most famous scientist and polymath of early Islamic Spain. The book considers his scientific activities as these intersected with design and craft, culminating in the aeronautics experiment for which he is best known today, as these are recounted in the Muqtabis, the chronicle compiled by the Cordoban court historian Ibn Hayyan, d. 1076. It calls into question notions that medieval Islamic artisans and designers were anonymous individuals working outside elite social and intellectual circles. The key passages from the chronicle are presented in English translation, including the oldest and most authoritative source for the aeronautics experiment. The Arabic texts are examined in tandem

with the earliest Islamic scientific instruments especially astrolabes and illustrated Arabic treatises of astronomy and engineering preserved in museums and libraries around the globe The book argues for a medieval Islamic court culture in which design and making were central to scientific intellectual pursuits and which may have shaped the culture of the Italian Renaissance

The New Universe and the Human Future Nancy Ellen Abrams, Joel R. Primack, 2020-08-11 A cultural philosopher and an astrophysicist attempt to decipher how we fit into the universe and the impact our placement has on us After a four century rupture between science and the questions of value and meaning this groundbreaking book presents an explosive and potentially life altering idea if the world could agree on a shared creation story based on modern cosmology and biology a story that has just become available it would redefine our relationship with Planet Earth and benefit all of humanity now and into the distant future Written in eloquent accessible prose and illustrated in magnificent color throughout including images from innovative simulations of the evolving universe this book brings the new scientific picture of the universe to life It interprets what our human place in the cosmos may mean for us and our descendants It offers unique insights into the potential use of this newfound knowledge to find solutions to seemingly intractable global problems such as climate change and unsustainable growth And it explains why we need to think cosmically act globally if we re going to have a long term prosperous future on Earth Should be read by anyone not just scientists who worry about the human condition

Deepak Chopra The Huffington Post A prophetic book Its message ranks right up there with those of Isaiah Jeremiah Ezekiel and Joel Like the prophets it is at times poetic demanding grounded soaring empowering and always awe inspiring Matthew Fox Tikkun The ideas and images are fascinating and certainly contribute to a sense of the profound stakes involved in what we re doing to the planet and ourselves William Kowinski North Coast Journal

Absence of Mind Marilynne Robinson, 2010-05-25 In this ambitious book acclaimed writer Marilynne Robinson applies her astute intellect to some of the most vexing topics in the history of human thought science religion and consciousness Crafted with the same care and insight as her award winning novels Absence of Mind challenges postmodern atheists who crusade against religion under the banner of science In Robinson s view scientific reasoning does not denote a sense of logical infallibility as thinkers like Richard Dawkins might suggest Instead in its purest form science represents a search for answers It engages the problem of knowledge an aspect of the mystery of consciousness rather than providing a simple and final model of reality By defending the importance of individual reflection Robinson celebrates the power and variety of human consciousness in the tradition of William James She explores the nature of subjectivity and considers the culture in which Sigmund Freud was situated and its influence on his model of self and civilization Through keen interpretations of language emotion science and poetry Absence of Mind restores human consciousness to its central place in the religion science debate

**Private Doubt, Public Dilemma** Keith Stewart Thomson, 2015-01-01 A distinguished scholar urges scientists and religious thinkers to become colleagues rather than adversaries in areas where their fields overlap Each age has its own crisis our modern experience of

science religion conflict is not so very different from that experienced by our forebears Keith Thomson proposes in this thoughtful book He considers the ideas and writings of Thomas Jefferson and Charles Darwin two men who struggled mightily to reconcile their religion and their science then looks to more recent times when scientific challenges to religion evolutionary theory for example have given rise to powerful political responses from religious believers Today as in the eighteenth century there are pressing reasons for members on each side of the religion science debates to find common ground Thomson contends No precedent exists for shaping a response to issues like cloning or stem cell research unheard of fifty years ago and thus the opportunity arises for all sides to cooperate in creating a new ethics for the common good

*A Common Faith* John Dewey,2013-08-28 In *A Common Faith* eminent American philosopher John Dewey calls for the emancipation of the true religious quality from the heritage of dogmatism and supernaturalism that he believes characterizes historical religions He describes how the depth of religious experience and the creative role of faith in the resources of experience to generate meaning and value can be cultivated without making cognitive claims that compete with or contend with scientific ones In a new introduction Dewey scholar Thomas M Alexander contextualizes the text for students and scholars by providing an overview of Dewey and his philosophy key concepts in *A Common Faith* and reactions to the text

*One World Now* Peter Singer,2016-01-01 Seamlessly integrates major development of the past decade into Peter Singer's classic text on the ethics of globalization *One World* One of the world's most influential philosophers here confronts both the perils and potentials inherent in globalization every issue is considered from an ethical perspective including climate change foreign aid human rights immigration and the responsibility to protect people from genocide and crimes against humanity Singer argues powerfully that solving global problems requires transcending national differences

**New Heavens and a New Earth** Jeremy Brown,2013-06-13 Jeremy Brown offers the first major study of the Jewish reception of the Copernican revolution examining four hundred years of Jewish writings on the Copernican model Brown shows the ways in which Jews ignored rejected or accepted the Copernican model and the theological and societal underpinnings of their choices

**The Fatigue of the Shari'a** A. Ahmad,2012-04-09 *The Fatigue of the Shari'a* places on a continuum two kinds of debates debates in the Islamic tradition about the end of access to divine guidance and debates in modern scholarship in Islamic legal studies about the end of the Shari'a The resulting continuum covers what access to divine guidance means and how it relates to Shari'a

*History as Prelude* Joseph V. Montville,2011-11-16 This collection of essays by seven highly respected scholars is a straightforward narrative of real world intellectual commercial spiritual philosophical scientific esthetic creative engagement among Jews Muslims and some Christians in daily life in Spain and around the Mediterranean *History as Prelude* is a major contribution to the Israeli Arab peace process because it undermines in fact blows away the efforts of propagandists who serve governments or political movements to negate the reality of the Arab Jewish relationship in the medieval Mediterranean The contributors in unassuming well researched scholarship have erected a wall protecting

historical reality from distortion providing irrefutable and often delightful examples of creative coexistence     *American Book Publishing Record Cumulative 1998* R R Bowker Publishing,1999-03     **Books in Series** ,1980     **Islam's Predicament with Modernity** Bassam Tibi,2009-02-25 This book presents an in depth cultural and political analysis of the issue of political Islam as a potential source of tensions and conflict and how this might be peacefully resolved Looking at modernity from an Islamic point of view the author analyses issues such as law knowledge and human rights     **Books in Series, 1876-1949** R.R.
