As more countries become water scarce, alternative water sources like treated wastewaters will be used to meet the demands of the domestic agriculture and industrial sectors. However, the use of treated wastewater is only justified when it is without any detrimental impacts on public health, food safety and water quality. To minimize impacts, well-operated treatment plants are important barriers that reduce the amount of contaminants disseminated from wastewaters into the environment during reuse events. Continuous accurate and comprehensive monitoring of our water further safeguards the public against potential risks. This eBook looks into topics that close the knowledge gaps in these mentioned areas.
