China, Pakistan and the Belt and Road Initiative Pascal Abb,Filippo Boni,Hasan

H. Karrar, 2024-06-21 Pakistan occupies an elevated role in China's Belt and Road Initiative BRI and hosts its flagship project the China Pakistan Economic Corridor CPEC. It has attracted the largest volume of investments under the BRI and opened itself comprehensively to its transformative potential. This book provides a comprehensive analysis of CPEC's impact on Pakistan's economy, politics, and society, covering its developmental benefits as well as resulting controversies. Interdisciplinary and international experts capture the complexity of CPEC, presenting new empirical data in the form of interviews, archival materials, and documentary evidence. Covering topics ranging from agriculture to the environment, gender to security, they focus on local outcomes, challenging prevalent narratives about the BRI as a strategic China-driven vehicle to transform other countries in its image. They argue that examples like CPEC should be understood as interactive processes between China and its international partners, which produce interdependent relations between them. Beyond the case of CPEC, these findings contribute to the burgeoning field of Global China through a comprehensive yet granular assessment of the first ten years of the BRI's flagship project. This book will be of interest to scholars of area studies, regionalization, international relations, and development studies, as well as China studies and South Asia studies, focused on the most important and far-reaching national-level implementation of the BRI to date. *The Post-Crisis Developmental State* Tamás Gerőcs, Judit Ricz, 2021-05-14

The focus of this volume is on the role of the developmental state in a situation in which a series of major crises affects the semi-periphery of the global economy. The authors go beyond the established debate on developmental states in East Asia by highlighting a much broader understanding of development and a very different global economic context. They also further the existing debate by covering new country cases. At the same time, they deepen our perspective on developmental states by looking at unusual sectors such as green industrial policy, education, and farming.

Geofinance between Political and Financial Geographies Silvia Grandi, Christian Sellar, Juvaria Jafri, 2019-12-27 This edited collection explores the boundaries between political and financial geographies, focusing on the linkages between the changing strategies, policies, and institutions of the state. It also investigates banks and other financial institutions affected by both state policies and a globalizing financial system, and the financial resources available to firms as well as households. In so doing, the book highlights how an empirical focus on the semi-periphery of the financial system may generate new perspectives on the entanglement between geo-politics and finance. *Public Sector Reforms in Pakistan* Abiha Zahra, Geert Bouckaert, Muhammad Zafar Iqbal Jadoon, Nasira Jabeen, 2022-06-10

This book provides a research-based analysis of public sector reforms in Pakistan. the professional practice of public administration particularly in South Asia

Explaining Pakistan's Long-Run Growth

Moazam Mahmood, Rabia Ikram, 2025-05-14 This book explains the behaviour of output and its growth over time. It does so by deliberating over a choice among three fundamental models: the Samuelson-Swan Solow neoclassical model, the Harrod-Domar model, and the Keynesian model, to choose one fit for purpose. The criteria for goodness of fit are some mathematical properties of growth models. The model chosen for meeting these properties is the Keynesian model, which is a bit better on all these counts. The chosen Keynesian model of aggregate demand has been used to explain the observed behaviour of Pakistan's long-run growth of gross domestic product (GDP). Pakistan's GDP growth over the long run between 1973 and 2019 is marked by a statistically significant hiatus at approximately 1992. Pre-1992 GDP growth on trend approximated 6 percent per annum. Post-1992, it drops on trend to approximately 4 percent per annum. Applied to the hiatus in Pakistan's GDP growth after 1992, this model shows that pre-1992 high GDP growth is explained by high investment growth paired with a low marginal propensity to consume (MPC), while post-1992 lowered GDP growth is explained by lower investment growth paired with a higher MPC. Thus, Pakistan's higher GDP growth pre-1992 was investment-led, while its lower GDP growth post-1992 has been consumption-led. The book then traces the causality of these trends in investment and consumption to a falling trend in public investment. This is linked to an increasingly austere regulatory policy environment, while private investment fails to step in and maintain aggregate investment.

Asian Economies

Jamus Jerome Lim, 2024-03-25 An insightful and thorough exploration of the economies of Asia. In *Asian Economies: History, Institutions, and Structure*, seasoned economist and professor Jamus Jerome Lim provides a comprehensive discussion and incisive analysis of the economies of Asia. In addition to discussing the sharp contrasts between the region's three major economies—China, India, and Japan—Lim also provides an overview of the rise of the Dragon economies of the East to the resource-rich economies of the West. The book adopts a unique approach to the treatment of these economies, weaving in aspects of these countries' economic geography and history, their idiosyncratic institutions and structures, along with providing a comparative and international perspective. The book offers careful emphasis on the geographic preconditions and enduring legacy of economic history on the contemporary and future prospects of each of the countries and regions discussed. Within examinations of the importance of the political and economic institutions, as well as market and industrial structures, in shaping the trajectories of the economies considered in the book, discussions of the dramatic differences and similarities between the Asian economies, as well as how these differences shape these economies' interactions with the rest of the world, are provided. Perfect for undergraduate and graduate students of economics, *Asian Economies* will also earn a place on the bookshelves of business and finance professionals seeking to understand the economies of the world's most diverse and dynamic region.
