informed decisions about generative AI in your organization In a world where ChatGPT DALL E Llama and other generative AI tools are reshaping business this practical guide helps you separate real opportunities from empty promises Making Sense of Generative AI provides a clear roadmap for understanding evaluating and implementing AI solutions that deliver genuine business value What You ll Learn How large language models AI image and video generators actually work Practical prompt engineering techniques for optimal AI outputs Setting up effective AI guardrails and safety measures Strategic frameworks for successful AI project implementation Future developments in artificial general intelligence and their business impact Real World Applications Across Industries Customer service automation with AI agents Document analysis and knowledge management Content creation for marketing and communications Personalized user experiences and engagement Includes Practical Resources Implementation frameworks and templates Risk assessment guidelines Business case calculation models Strategic planning tools for AI transformation Perfect For Curious minds seeking practical knowledge about AI technology Business leaders and executives planning AI initiatives Project managers implementing generative AI solutions Innovation teams exploring new AI capabilities Professionals wanting to understand AI s business implications **The Swimmer**

William R. Uttal,Gary Bradshaw,Sriram Dayanand,Robb Lovell,Thomas Shepherd,2014-02-25 This research monograph describes a large programming project in which an underwater organism capable of perceiving learning deciding and navigating is computationally simulated The developed computational model serves as a contemporary theory of perceptual motor performance embodying much of what is known about human vision and some of what is known about other cognitive processes This artificial intelligence project has substantial contributions to make to the development of autonomous underwater vehicles It also makes a specific theoretical statement about the organization and nature of organic perceptual motor systems that may be useful to psychologists neuroscientists and theoreticians in a number of other fields *Sensors and Their Applications VIII, Proceedings of the eighth conference on Sensors and their Applications, held in Glasgow, UK, 7-10 September 1997* A. T. Augousti,Neil White,1997-01-01 Sensors and Their Applications VIII provides a valuable forum for individuals from all over the world working in all areas of sensors to meet and discuss the developments and applications of transducers and sensor systems The strength of the sensor community in the UK reinforces the importance of this volume as a valuable reference for all workers in the field **Symbiotic Interaction** Giulio Jacucci,Luciano Gamberini,Jonathan Freeman,Anna Spagnolli,2014-12-05 This book constitutes the proceedings of the third International Workshop on Symbiotic Interaction Symbiotic 2014 held in Helsinki Finland in October 2014 The 8 full papers and 5 short papers presented in this volume were carefully reviewed and selected from 16 submissions They are organized in topical sections named definitions of symbiotic interaction reviews of implicit interaction example applications experimenting with users and demos and posters

*Remote Sensing Image Analysis: Including the Spatial Domain* Steven M. de Jong,Freek D. van der Meer,2007-07-26 Remote Sensing image analysis is mostly done using only spectral information on a pixel by pixel basis Information captured

in neighbouring cells or information about patterns surrounding the pixel of interest often provides useful supplementary information This book presents a wide range of innovative and advanced image processing methods for including spatial information captured by neighbouring pixels in remotely sensed images to improve image interpretation or image classification Presented methods include different types of variogram analysis various methods for texture quantification smart kernel operators pattern recognition techniques image segmentation methods sub pixel methods wavelets and advanced spectral mixture analysis techniques Apart from explaining the working methods in detail a wide range of applications is presented covering land cover and land use mapping environmental applications such as heavy metal pollution urban mapping and geological applications to detect hydrocarbon seeps The book is meant for professionals PhD students and graduates who use remote sensing image analysis image interpretation and image classification in their work related to disciplines such as geography geology botany ecology forestry cartography soil science engineering and urban and regional planning

**Proceedings of Asia Pacific Computer Systems Conference 2021** Anu Gokhale,Emanuel Grant,2023-02-17 This book contains select proceedings papers from the Asia Pacific Computer Systems Conference APCS 2022 The contents focus on the design and implementation of languages data models process models algorithms software and hardware for information systems The chapters also include contributions on data mining and knowledge discovery addressing detailed descriptions of significant applications This book proves a valuable resource for those in academia and industry interested in computational intelligence artificial intelligence and automation

Recognition Remote Sensing Vision Analysis and Understanding Image Processing and Low level Vision Object Detection Segmentation and Tracking      Monitoring, Simulation, Prevention and Remediation of Dense Debris Flows II D. De Wrachien, Mario Aristide Lenzi, C. A. Brebbia, 2008 This book contains papers presented at Second International Conference on Debris Flow including all aspects of Debris Flow Monitoring Modelling Hazard Assessment Mitigation Measures Case Studies and Extreme Events Erosion Slope Instability and Sediment Transport held in the New Forest UK in 2008 and organised by the Wessex Institute of Technology with the co sponsorship of EurAgEng European Society of Agricultural Engineers and CIGR International Commission of Agricultural Engineering Due to the increased frequency with which debris and hyper concentrated flows occur and the impact they have on both the environment and human life in recent years these extreme events and related processes have attracted increasing attention from research groups land planning and management professionals The objective of the Meeting was to provide a forum for engineers scientists and managers from laboratories industry government and academia to interchange knowledge and expertise in the field of dense and hyper concentrated flows A full understanding of these phenomena leads to a new integrated risk management approach which provides measures for preventing a hazard turning into a natural disaster      **Computer Analysis of Images and Patterns**

Walter Kropatsch, Martin Kampel, Allan Hanbury, 2007-08-18 The refereed proceedings of the 12th International Conference on Computer Analysis of Images and Patterns are presented in this volume The papers cover motion detection and tracking medical imaging biometrics color curves and surfaces beyond two dimensions reading characters words and lines image segmentation shape image registration and matching signal decomposition and invariants and features and classification

**Image Analysis and Recognition** Aurelio Campilho, Mohamed Kamel, 2012-06-21 The two volume set LNCS 7324 7325 constitutes the refereed proceedings of the 9th International Conference on Image and Recognition ICIAR 2012 held in Aveiro Portugal in June 2012 The 107 revised full papers presented were carefully reviewed and selected from 207 submissions The papers are organized in topical sections on clustering and classification image processing image analysis motion analysis and tracking shape representation 3D imaging applications biometrics and face recognition human activity recognition biomedical image analysis retinal image analysis and call detection and modeling      **Image Processing,**
