Islam In The Balance Ideational Threats In Arab Politics:

Islam in the Balance Lawrence Rubin, 2014-06-04 *Islam in the Balance Ideational Threats in Arab Politics* is an analysis of how ideas or political ideology can threaten states and how states react to ideational threats. It examines the threat perception and policies of two Arab Muslim majority states, Egypt and Saudi Arabia, in response to the rise and activities of two revolutionary Islamic states established in Iran 1979 and Sudan 1989. Using these comparative case studies, the book provides important insight about the role of religious ideology for the international and domestic politics of the Middle East and in doing so advances our understanding of how why and when ideology affects threat perception and state policy. Rubin makes clear that transnational ideologies may present a greater and more immediate national security threat than shifts in the military balance of power, first because ideology or ideational power triggers threat perception and affects state policy, second because states engage in ideational balancing in response to an ideological threat. The book has significant implications for international relations theory and engages important debates in comparative politics about authoritarianism and Islamic activism. Its findings about how an Islamist regime or state behaves will provide vital insight for policy creation by the US and its Middle East allies should another such regime or state emerge.

Threats and Alliances in the Middle East May Darwich, 2019-09-26 Examines Saudi and Syrian policies during three pivotal wars to understand how identity and power influence state behaviour in the Middle East. Routledge Handbook on Middle East Security Anders

Jägerskog, Michael Schulz, Ashok Swain, 2019-02-11 *Routledge Handbook on Middle East Security* provides the first comprehensive look at Middle East security issues that includes both traditional and emerging security threats. Taking a broad perspective on security, the volume offers both analysis grounded in the hard military and state security discourse but also delves into the soft aspects of security employing a human security perspective. As such, the volume addresses imminent challenges to security such as the ones relating directly to the war in Syria but also the long term challenges. The traditional security problems which are deep seated are at risk of being exacerbated also by a lack of focus on emerging vulnerabilities in the region. While taking as a point of departure the prevalent security discourse, the volume also goes beyond the traditional focus on military or state security and considers non traditional security challenges. This book provides a state of the art review of research on the key challenges for security in the Middle East; it will be a key resource for students and scholars interested in Security Studies, International Relations, Political Science and Middle Eastern Studies.

Sectarianism and Civil War in Syria Raymond Hinnebusch, Morten Valbjørn, 2025-04-14 As an epicentre of sectarian conflict before and after the Arab uprising, Syria provides an excellent laboratory for the study of sectarianization. This book compares variance in Syria's sectarianism over time and across place to expose its causes and its varying impact on Syria's society and polity. The book begins with an introductory chapter examining key approaches to and debates over sectarianism in Syria from which a framework of analysis is derived. Subsequent empirical chapters are divided into two sections. Several

chapters examine key aspects of sectarianism at the national level looking at the interaction of sectarianism and state formation over the long term the internal evolution of sectarianization during the uprising the impact of the regional power struggle on Syria's sectarianization and whether sectarianism was institutionalized by civil war governance in both regime and opposition controlled areas A second set of chapters looks at sectarianism in Syria's different cities regions and communities notably in Damascus Homs Hama Aleppo Idlib the Alawi coast and the Druze and Christian communities The concluding chapter makes use of the analytical framework to systematically compare the evidence from the empirical cases in order to identify regularities Providing nuanced insights into the Syrian case whilst informing broader theoretical discussions of sectarianism this book will appeal to students researchers and general readers interested in Middle Eastern politics and political science generally

The Arab Gulf States and the West Dania Koleilat Khatib, Marwa Maziad, 2018-10-30 This book examines the changing image of the Arab Gulf States in the West It addresses the question of perception in international relations and how the Arab States of the Gulf have pursued various endeavors to project themselves into Western imagination The book chapters generate ideas on how perceptions came about and ways to improve cultural and political realities on the ground in the Arab Gulf States Thus it paves the way for a new area of research in the field of Gulf Studies that extends beyond traditional international relations frameworks by weaving elements of intercultural communication into the mix Recognizing yet extending beyond a traditionally realist framework which has dominated the analysis of Arab Gulf States foreign relations with western countries this book tackles both the materialist and the symbolic in the efforts and initiatives launched by the Arab Gulf States Some chapters maintain a social scientific approach about the politics of the Arab Gulf States in the West from an international relations lens Others employ theoretical frameworks that were founded on the notion of the encounter with anthropological lenses and concepts of intercultural communication In addition to the value of this academic research agenda as such some of the chapters also touch upon the added importance of policy oriented input As the Arab Gulf States actively engage with the West the book would widely appeal to students and researchers of Gulf politics and international relations

Routledge Handbook of International Relations in the Middle East Shahram Akbarzadeh, 2019-03-26 This handbook examines the regional and international dynamics of the Middle East It challenges the state society dichotomy to make sense of decision making and behavior by ruling regimes The 33 chapter authors include the world's leading scholars of the Middle East and International Relations IR in order to make sense of the region This synthesis of area studies expertise and IR theory provides a unique and rigorous account of the region's current dynamics which have reached a crisis point since the beginning of the Arab Spring The Middle East has been characterized by volatility for more than a century Although the region attracts significant scholarly interest IR theory has rarely been used as a tool to understand events The constructivist approach in IR highlights the significance of state identity shaped by history and culture in making sense of international relations The authors of this volume consider how IR
