Man-made Global Warming Hans H. J. Labohm, Simon Rozendaal, Dick Thoenes, 2004 These three Dutchmen respectively an international relations expert a scientific journalist and a chemical engineer past chairman of the Royal Netherlands Chemical Society form part of that growing body of reasonable and qualified people who feel unease at the claims of scientific consensus on climate change and wonder at the policies flowing from those claims If the science is flawed plainly the policies are too Worldwide billions of public money will be mis spent unnecessary costs placed on existing industry new industrial development hampered Together these three authors are well placed to point up the weaknesses in the scientific argument that global warming is a man made phenomenon and are able to analyse that murky place where the needs for recognition research grants and votes all come together Could it really be the case that the global warming crisis is really as much about careers and power as anything else
