Lochlann Jain,2013-10-15 Cancer can kill this fact makes it concrete Still it s a devious knave Nearly every American will experience it up close and all too personally wondering why the billions of research dollars thrown at the word haven t exterminated it from the English language Like a sapper diffusing a bomb Jain unscrambles the emotional bureaucratic medical and scientific tropes that create the thing we call cancer Scientists debate even the most basic facts about the disease while endlessly generated disputed population data produce the appearance of knowledge Jain takes the vacuum at the center of cancer seriously and demonstrates the need to understand cancer as a set of relationships economic sentimental medical personal ethical institutional statistical Malignant analyzes the peculiar authority of the socio sexual psychopathologies of body parts the uneven effects of expertise and power the potentially cancerous consequences of medical procedures such as IVF the huge industrial investments that manifest themselves as bone cold testing rooms the legal mess of medical malpractice law and the teeth grittingly jovial efforts to smear makeup and wigs over the whole messy problem of bodies spiraling into pain and decay Malignant examines the painful cognitive dissonances produced by the ways a culture that has relished dazzling success in every conceivable arena have twisted one of its staunchest failures into an economic triumph The intractable foil to American achievement cancer hands us on a silver

platter and ready for Jain's incisively original dissection of our sacrifice to the American Dream **Mediating Memory** Bunty Avieson, Fiona Giles, Sue Joseph, 2017-10-16 The argument has been made that memoir reflects and augments the narcissistic tendencies of our neo liberal age *Mediating Memory: Tracing the Limits of Memoir* challenges and dismantles that assumption Focusing on the history, theory and practice of memoir writing, editors Bunty Avieson, Fiona Giles and Sue Joseph provide a thorough and cutting edge examination of memoir through the lenses of ethics, practice and innovation. **Le Tour: A History of the Tour de France** Geoffrey Wheatcroft, 2013-06-20 Geoffrey Wheatcroft's hugely entertaining and well researched history of the Tour de France is already established as the definitive account of cycling's greatest event. Since the book was last published in 2007, much has changed. Bradley Wiggins' historic victory in 2012, the first Briton ever to secure the yellow jersey, brought him a knighthood and garnered more interest in the race than ever before. Yet the months after were dominated by an even bigger story as Tour legend and seven-time winner Lance Armstrong was stripped of his titles and confessed on Oprah to doping in each of his victories. Suddenly, everything that we thought we knew had happened was no longer true. In this new and comprehensively revised edition of the book, Wheatcroft not only brings his story of the Tour fully up to date to mark the race's 100th running in 2013, he also reflects on the changes brought about by the scandals that have rocked the sport to its core. Yet for all the controversies of modern times, he vividly captures the essential glory and romance of the heroes who battle to conquer one of sport's greatest challenges.

**Brothers, Stand Firm** Steve Bateman, 2014-11-12 There are pivotal moments in history when the trajectory of marriages, families, businesses, movements and nations could go one way or another, producing very different outcomes. The need of our generation is the same as every other: a disciplined army of credible men who know practice and invest seven things in the next generation. Henderson,Charles L. Hooper,2006 The phrase work smarter not harder has been repeatedly ridiculed in the Dilbert comic strip and elsewhere not because it is a bad idea but because it is thrown like a brick lifesaver to drowning employees To tell someone to work smarter is like telling someone to be happier healthier and richer It's not much help to merely repeat the objective what people need is a plan for achieving the objective In Making Great Decisions we show our readers how to achieve their objectives We write to help those in business and those in the business of life i.e everyone to work smarter Our ideas are both simple and powerful We offer a better way to look at problems so that the solutions are easier to find We help supplement our readers clear thinking by summarizing some of the most powerful techniques we have discovered Have you ever driven through corn country From a distance all you see are corn stalks and more corn stalks in a jumbled mess Then suddenly when you get closer your perspective changes and you can see down the rows and realize that the corn was planted perfectly in straight lines Your perception of the crop changes from a messy jumble to a clear picture

simply because you're in the right spot. This book puts readers in that ideal spot. So many problems seem like hopeless jumbles, but then when you start using the techniques we discuss here, they start to look as straightforward as the straightest line in an Iowa cornfield. What motivated us to write this book is that over the years, both of us have regularly come across people in organizations—often bright people with MBAs or other graduate degrees—who don't think they have the time, energy, or skills to make good decisions. They have many clues but don't know how to put them together. They regularly face situations that they could analyze with some of the tools they learned in their courses, but they don't realize that we don't hold ourselves apart from this group, and stories of our successes and failures are sprinkled throughout.
