Assessment in Education Detlev Leutner,Jens Fleischer,Juliane Grünkorn,Eckhard Klieme,2017-03-27 This book addresses
challenges in the theoretically and empirically adequate assessment of competencies in educational settings It presents the
scientific projects of the priority program Competence Models for Assessing Individual Learning Outcomes and Evaluating
Educational Processes which focused on competence assessment across disciplines in Germany The six year program
coordinated 30 research projects involving experts from the fields of psychology educational science and subject specific
didactics The main reference point for all projects is the concept of competencies which are defined as context specific
cognitive dispositions that are acquired and needed to successfully cope with certain situations or tasks in specific domains
Koeppen et al 2008 p 62 The projects investigate different aspects of competence assessment The primary focus lies on the
development of cognitive models of competencies complemented by the construction of psychometric models based on these
theoretical models In turn the psychometric models constitute the basis for the construction of instruments for effectively
measuring competencies The assessment of competencies plays a key role in optimizing educational processes and improving
the effectiveness of educational systems This book contributes to this challenging endeavor by meeting the need for more
integrative interdisciplinary research on the structure levels and development of competencies *Principles and Practice of*
