How to Use This Study Guide

This study guide is designed to work in conjunction with the course videos, the practice quizzes located in the course learning resource, and, if needed, the course textbook images and readings specified in each module. Once you have completed all of the recommended activities, use this study guide as a review tool before taking your assessments.

To complete the study questions, provide a sufficient response to each question in your own words and in terms that will help you understand, remember, and retain the information. Use the recorded videos as resources to help you answer these study questions. If you find a question that you cannot answer, please reach out to your course mentor for additional clarification and support.

Module 1: Scientific Concepts and Methodologies

◆ Topic: *Scientific Methodologies*

Scientific Methods

1. Describe the scientific method. Explain how it is used in the process of science to solve problems.
2. Complete the following chart by providing a definition and example for each component of the scientific method.

Term	Definition	Example
observation		
question		
hypothesis		
prediction		
reproducible results		
conclusion		

3. Discuss the role of creativity in each of the steps of the scientific process.
4. Explain how Galileo challenged Aristotle's belief that heavy objects fall faster than lighter objects. Consider how Galileo's actions were related to the scientific method.

Scientific Investigations

1. Identify and discuss important considerations when designing a controlled science experiment.
