serve as an authoritative and comprehensive guide in the field **Agents and Data Mining Interaction** Longbing Cao, A.E. Gorodetsky, Jiming Liu, Gerhard Weiß, Philip S. Yu, 2009-07-30

The 2009 International Workshop on Agents and Data Mining Interaction ADMI 2009 was a joint event with AAMAS 2009. In recent years, agents and data mining interaction ADMI or agent mining for short has emerged as a very promising research field. Following the success of ADMI 2006 in Hong Kong, ADMI 2007 in San Jose and ADMI 2008 in Sydney, the ADMI 2009 workshop in Budapest provided a premier forum for sharing research and engineering results as well as potential challenges and prospects encountered in the synergy between agents and data mining. As usual, the ADMI workshop encouraged and promoted theoretical and applied research and development which aims at exploiting agent driven data mining and demonstrating how intelligent agent technology can contribute to critical data mining problems in theory and practice. Improving data mining driven agents and showing how data mining can strengthen agent intelligence in research and practical applications. Exploring the integration of agents and data mining toward a super intelligent information processing and systems. Identifying challenges and directions for future research on the synergy between agents and data mining. ADMI 2009 featured two invited talks and twelve selected papers. The first invited talk was on Agents and Data Mining in Bioinformatics with the second focusing on Knowledge Based Reinforcement Learning. The ten accepted papers are from seven countries. A majority of submissions came from European countries, indicating the boom of ADMI research in Europe. In addition, the two invited papers addressed fundamental issues related to agent driven data mining, data mining driven agents, and agent mining applications. The proceedings of the ADMI workshops will be published as part of the LNAI series by Springer. We appreciate the support of Springer and in particular Alfred Hofmann.

Optimal and Robust Estimation Frank L. Lewis, Lihua Xie, Dan Popa, 2017-12-19. More than a decade ago, world renowned control systems authority Frank L. Lewis introduced what would become a standard textbook on estimation under the title *Optimal Estimation*, used in top universities throughout the world. The time has come for a new edition of this classic text, and Lewis enlisted the aid of two accomplished experts to bring the book completely up to date with the estimation methods driving today's high performance systems. A Classic Revisited: *Optimal and Robust Estimation With an Introduction to Stochastic Control Theory*. Second Edition reflects new developments in estimation theory and design techniques. As the title suggests, the major feature of this edition is the inclusion of robust methods. Three new chapters cover the robust Kalman filter, H_∞ filtering, and H_∞ filtering of discrete time systems. *Modern Tools for Tomorrow's Engineers*. This text overflows with examples that highlight practical applications of the theory and concepts. Design algorithms appear conveniently in tables, allowing students quick reference, easy implementation into software, and intuitive comparisons for selecting the best algorithm for a given application. In addition, downloadable MATLAB code allows students to gain hands-on experience with industry standard software tools for a wide variety of applications. This cutting edge and highly interactive text makes teaching and learning

estimation methods easier and more modern than ever
