Research Anthology on Developing Effective Online Learning Courses Management Association, Information Resources, 2020-12-18 In the current educational environment there has been a shift towards online learning as a replacement for the traditional in person classroom experience. With this new environment comes new technologies, benefits and challenges for providing courses to students through an entirely digital environment. With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning motivation and success. The optimization of these online tools requires a deeper look into curriculum, instructional design, teaching techniques and new models for student assessment and evaluation. Information on how to create valuable online course content, engaging lesson plans for the digital space and meaningful student activities online are only a few of many current topics of interest for promoting student achievement through online learning. The Research Anthology on Developing Effective Online Learning Courses provides multiple perspectives on how to develop engaging and effective online learning courses in the wake of the rapid digitalization of education. This book includes topics focused on online learners, online course content, effective online instruction strategies and instructional design for the online environment. This reference work is ideal for curriculum developers, instructional designers, IT consultants, deans, chairs, teachers, administrators, academicians, researchers and students interested in the latest research on how to create online learning courses that promote student success.

Personalized Human-Computer Interaction Mirjam Augstein, Eelco Herder, Wolfgang Würndl, 2023-08-07 Personalized and adaptive systems employ user models to adapt content, services, interaction or navigation to individual users' needs. User models can be inferred from implicitly observed information such as the user's interaction history or current location or from explicitly entered information such as user profile data or ratings. Applications of personalization include item recommendation, location based services, learning assistance and the tailored selection of interaction modalities. With the transition from desktop computers to mobile devices and ubiquitous environments the need for adapting to changing contexts is even more important. However, this also poses new challenges concerning privacy issues, user control, transparency

and explainability In addition user experience and other human factors are becoming increasingly important This book describes foundations of user modeling discusses user interaction as a basis for adaptivity and showcases several personalization approaches in a variety of domains including music recommendation tourism and accessible user interfaces
