Java for Practitioners John Hunt,2012-12-06 Java for Practitioners doesn't just provide an introduction to Java it also tells you all about object orientation One of the biggest problems with many of the Java books currently on the market is that they only teach the language and ignore the object orientation aspects or at best just devote one chapter to it Not only does John Hunt cover both Java and object orientation thoroughly but he also realises that practitioners learn best by doing and he writes this book to reflect that Chapters are dipable into and ideas and concepts are introduced by exercises and practical examples The book does of course cover the new release Java 2 JDK 1.2 and it also includes the Java Self Tester which lets readers determine whether they are ready to take Sun's Java Certification exam There is also an essential reference section which provides detailed solutions to real world Java problems and new Java features No one intending to move over to Java should be without this book

From Knowledge Abstraction to Management Aparajita Suman,2013-10-31 The increasing volume of information in the contemporary world entails demand for efficient knowledge management KM systems a logical method of information organization that will allow proper semantic querying to identify things that match meaning in natural language On this concept the role of an information manager goes beyond implementing a search and clustering system to the ability to map and logically present the subject domain and related cross domains From Knowledge Abstraction to Management answers this need by analysing ontology tools and techniques helping the reader develop a conceptual framework from the digital library perspective Beginning with the concept of knowledge abstraction before discussing the Solecistic versus the Semantic Web the book goes on to consider knowledge organisation
