

## Cost-Effective Bridge Maintenance Activities

The screenshot shows a presentation slide with a blue header. The header contains the FHWA logo, the text 'Fundamentals of Bridge Maintenance', and a 'Next' button. Below the header, the slide title 'Cost-Effective Bridge Maintenance Activities' is displayed. To the left of a central photograph is a bulleted list of maintenance activities. The photograph shows a close-up of a metal drainage grate on a bridge deck, which is completely covered and blocked by a thick layer of dark debris.

- Routine cleanings
- Maintaining approaches
- Sealing deck joints
- Cleaning, or clearing drainage

Poor drainage causes standing water, debris accumulation, safety problems, and salt penetration. A drainage system can fail for several reasons, such as inadequate design, too small an inlet opening, or damage at the outlet. The photo on this slide shows a drainage grate that is completely blocked by debris. Cost-effective maintenance activities in this case would be to clean the drainage system or to replace parts of the system if necessary.
