

1. Decide on a conceptual design framework first – as planning progresses you can modify the plan if necessary.

2. Create a vision of the learners at the end of the process.

3. Using the steps in backwards design described in the last chapter, decide what goals, questions, and criteria to use.

4. Develop assessments that match the content and fit into the end vision of the learner.

5. Decide on how to deliver or implement the curriculum.

6. Reflect, evaluate, and revise using the collaborative process.

## **Integrated Thematic Curriculum And Common Core:**

The Challenge for School Leaders Ronald Warwick, 2014-11-28 The Challenge for School Leaders identifies essential systems and their elements that enhance the school leader's knowledge and skill to continually improve the academic program through a faculty collaborative process. The critical systems addressed are system elements communication curriculum instruction assessment and collaborative decision making to determine causes of nonproductive systems and solutions to remove and solve these issues. The text includes a pre and post school assessment survey process that involves the faculty and administrators in evaluating their school and identifying critical areas that need improvement. This survey has been statistically affirmed for high reliability and validity with respect to academic system behaviors correlated with high academic student performance. The continual improvement philosophy is the foundation of this text and collaboration is the method by which this concept is achieved. The value of each person is critical and everyone is needed to improve the academic systems to serve the needs of the students and the faculty. The communication linkage system as well as curriculum instruction assessment integration is addressed and is essential to the improvement process. The analysis and improvement of the instructional process is the key to enhancing student academic performance. The concepts and practical suggestions along with the knowledge and skills to build an effective academic system for students is the aim of this study.

Effective Educational Programs, Practices, and Policies for English Learners Liliana Minaya-Rowe, 2014-10-01 The central issue of this volume is how to meet the linguistic and academic needs of the increasing numbers of English learners (ELs). At the center of educational turns is the role of school professionals in this Common Core Standards era. Teacher education programs and professional development or pre-service and in-service programs for teachers of ELs are currently being reframed to reflect the new demands placed on all teachers in light of the new standards. The expectation is that ELs can learn and their teachers possess the expertise to teach both discipline content and academic English at the same time. The large numbers of ELs across the country have created a wide gap between what teachers have been trained to do and the skills they need to teach and reach them effectively. This practical handbook brings together research, policy and practice on teacher effectiveness pre-service and in-service programs in the context of student linguistic and cultural diversity. Key features include: Clearly articulated teacher training and professional development programs; Coverage of Common Core curriculum and a variety of instructional programs and practices with research-based tools to implement them; and Policies to equitably and effectively prepare ELs academically and linguistically.
