AI-assisted Programming for Web and Machine Learning Dr. Muralidhar Kurni,2025-10-08 DESCRIPTION Artificial intelligence is redefining how software is created enabling developers to code faster improve accuracy and bring innovative ideas to life In today s competitive technology landscape AI assisted programming is no longer optional it s a core skill for building modern web applications and machine learning solutions This book systematically guides you through the whole development cycle You will start with the foundations of understanding AI assisted programming setting up your environment and mastering prompt engineering You will then discover how AI can accelerate front end and back end web development enhance debugging and optimize performance You will also explore data preprocessing model creation training and deploying optimized solutions with the help of real world examples case studies and hands on exercises ensuring you can apply every concept in practice Also by mastering prompt engineering you will be able to generate debug and optimize code across both these high demand fields By the end of this book you will have the confidence and skills to integrate AI into your workflow automate time consuming tasks build intelligent applications and deliver impactful future ready solutions WHAT YOU WILL LEARN Apply prompt engineering effectively for web and ML projects Develop AI powered front end and back end applications efficiently Automate debugging testing and performance optimization with AI Integrate AI tools seamlessly into full stack development workflows Train fine tune and deploy scalable ML models in the cloud Understand AI assisted programming concepts and set

up development tools Preprocess data and create AI driven machine learning pipelines WHO THIS BOOK IS FOR This book is for learners who want to explore the power of AI assisted programming in web development and machine learning Software engineers web developers and data scientists who possess foundational programming skills ideally with Python or JavaScript can also use it to upgrade their skills TABLE OF CONTENTS 1 AI in Programming 2 Setting up Your AI Environment 3 Prompt Engineering 4 AI in Front end Development 5 AI for Back end Development 6 Debugging and Optimization with AI 7 Data Preprocessing with AI 8 Building and Training Machine Learning Models 9 Deploying Optimized ML Models 10 Real world Applications 11 Future Innovations and Ethics in AI Artificial Intelligence Learning Facilitators Fadi

Al-Turjman,2025-10-28 Artificial Intelligence Learning Facilitators Creating Smart Education Systems delves into the various AI based techniques such as machine learning and natural language processing that can help in automating management tasks such as lecture preparation students performance evaluation and predictive performance assessment It highlights the importance of AI in handling the increasing learning complexities The book explores the use of AI based virtual assistants and chatbots in enhancing teaching services for students and instructors It also discusses the potential of AI in creating personalized and targeted learning experiences The centerpiece of the book is a presentation of the learning and teaching system AI Prof DUX The use cases cover such scenarios as Question generation for quizzes and exams The development and implementation of lecture scheduling The lecture notes generator Examination platform Lecture video link generation Classroom chat platform Courses management The book is an exploration of the crucial role of AI as a game changer in educational transformation It emphasizes how AI can positively impact various aspects of smart education systems

Smart Infrastructures in the IoT Era Fadi Al-Turjman,2025-01-02 This book provides a comprehensive overview of advanced digital disruptive technologies that can be used or currently used in Construction and Smart Infrastructures It provides a holistic collection of such disruptive technologies to address issues or otherwise uplift the technological aspects of various aspects of human lives and projects impacting the overall culture and society sustainability These pertinent technologies explored in this book are Artificial Intelligence AI Internet of Things IoT Unmanned Aerial Vehicles UAVs Clouds and Big Data It is expected that the book will unify the fields of construction and project management through the integration AI frameworks provided in various chapters Learn Ethereum: The Collection Bruno Skvorc,Mislav Javor,Tonino Jankov,Mateja Kendel,Chris Ward,Ahmed Boucheфра,David Attard,2018-08-16 Blockchain technology has certainly been hyped over the past few years but when you strip all of that away what can actually do with it This book provides you with an introduction to Ethereum an open source platform that s based based on blockchain It enables developers to build and deploy decentralized applications that can be relied on to work without fraud censorship or interference from third parties Far more than just a cryptocurrency or smart contracts platform Ethereum is becoming an entire ecosystem for building decentralized applications This collection contains three books A Developer s Guide to

Ethereum a collection of articles that provides an introduction to blockchain technology more broadly before focusing on the Ethereum platform specifically Ethereum Tools Skills a collection of articles examining some of the most popular Ethereum tools and walk you through how to use them when building your own Ethereum based apps Build Your First Ethereum DApp a complete project tutorial that will walk you through the creation of a complete distributed application DApp based on the Ethereum platform This collection is for anyone interested in using the Ethereum platform for development No prior knowledge of blockchain is assumed

Smart Restaurant. A Management Application for Restaurants and Hotels
Abish Gurung,Bamdev Bhandari,Bishnu Sharma,Hari K. C.,2017-12-19 Scientific Essay from the year 2017 in the subject Computer Science Software grade 10 8 course Institute of Engineering language English abstract Traditional method that has commonly been used in hotels is taking the customer s orders and writing it down on a piece of paper Many solutions have been proposed for solving this issue Smart Restaurant is a Management Application for ordering browsing searching and booking the hotel and restaurant services menus and items This Project aims to make easy for hotel services with minimum manpower and by digital in hotel No login or user authentication is required to view or search products Any normal guest user can view on our services and view items and products inside hotel Wi Fi coverage area and by web application He she can search order different products and can even add them to the KOT also booking services then registered their basic info as Table Number using application by scanning the barcode on table We are implementing this system using Web application for User and Restaurant There is an enormous potential benefit for these businesses in recording customer orders and serving the foods Without any doubt this is very convenient effective and easy so that it improves the performance of restaurant s staff and maximize the customer s visits which will ultimately boost the economy of the restaurant
