questions and points to new research directions in addition to the findings that each of the authors demonstrates. Despite rapid progress in VGI research, this Handbook also shows that there are technical, social, political, and methodological challenges that require further studies and research. *Advances and New Trends in Environmental and Energy Informatics* Jorge Marx Gomez, Michael Sonnenschein, Ute Vogel, Andreas Winter, Barbara Rapp, Nils Giesen, 2015-12-24. This book presents the latest findings and ongoing research in the field of green information systems and green information and communication technology (ICT). It provides insights into a whole range of cross-cutting topics in ICT and environmental sciences as well as showcases how information and communication technologies allow environmental and energy efficiency issues to be handled effectively. The papers presented in this book are a selection of extended and improved contributions to the 28th International Conference on Informatics for Environmental Protection dedicated to ICT for energy efficiency. This book is essential and particularly worth reading for those who already gained basic knowledge and want to deepen and extend their expertise in the subjects mentioned above. *The European Information Society* Sara Fabrikant, Monica Wachowicz, 2007-12-12. The Association of Geographic Information Laboratories for Europe (AGILE) conferences provide a multidisciplinary forum for an increasingly varied landscape of scientific knowledge production and dissemination to the GI Scientists from around the world. This year's landmark 10 AGILE Conference held at the top of Europe in Aalborg, Denmark, brought a number of significant changes to the well-established conference series. For the first time, the call for papers included a full paper submission track of original unpublished fundamental scientific research, the results of which you will find published in this volume. The response for this call provides ample evidence that GI Science and Systems are alive and well in Europe. Twenty-eight papers out of 62 submissions were accepted for this volume; acceptance rate 45%. Judging by the author's affiliations in this volume, the diverse AGILE Community includes but is not limited to computer scientists, geographers, geomatic engineers, GI Science practitioners, just to mention a few. The breadth of submissions reflects a vibrant and globally interconnected GI Science community. You will find contributions from all four corners of Europe as well as from China, Japan, and the United States. *Governance and Sustainability of Responsible Research and Innovation Processes* Fernando Ferri, Ned Dwyer, Saša Raicevich, Patrizia Grifoni, Husne Altioğlu, Hans Thor Andersen, Yiannis Laouris, Cecilia Silvestri, 2018-01-24. This book provides methods and practical cases and experiences with the aim of stimulating Responsible Research and Innovation (RRI) through the direct engagement of researchers, Civil Society Organisations (CSOs), citizens, industry stakeholders, policy and decision makers, research funders, and communicators. The book furthermore aims to advance debate on Responsible Research and Innovation and also to reinforce the RRI community identity. With chapters covering governance, public engagement, and inclusion in responsible RRI actions in science education and communication, gender, and ethical issues in RRI initiatives and sustainability of RRI processes, the book is solidly part of the Europe 2020 strategy to promote a vision for stronger collaborations between social, natural, and physical scientists and the societal

actors for a wider dimensions of science and innovation and the role in environmental preservation Chapters 1 and 3 are open access under a CC BY 4.0 license via link [springer.com](https://www.springer.com)
