considers himself a pure metaphysician which is rather unique in the contemporary philosophical landscape What are we to make of this and similar claims What do they mean in light of the effort made during the last several centuries to overcome overturn destroy or deconstruct metaphysics If we consider Deleuze's work more closely might find him engaging in the kind of thinking that is commonly referred to as metaphysical And if Deleuze is indeed a metaphysician does this undercut the many insightful contributions of the twentieth century philosophers who dedicate their thought to bringing down Western metaphysical tradition Or does it suggest that there is a sense of metaphysics that should nevertheless be preserved These and similar questions are addressed in this volume by a series of international scholars The goal of the book is to critically engage an aspect of Deleuze's thought that for the most part has been neglected and to understand better his immanent metaphysics It also seeks to explore the consequences of such an engagement

**Isotopography** Niels Wilde, 2024-08-19 While the concept of place remains undertheorized in Kierkegaard research this study argues that place is at the center of Kierkegaard s thinking The first part of the book shows that Kierkegaard s notion of situatedness as being placed in a socio historical situation conditioned by a situation prior to situatedness points to a realist position and a flat ontology Secondly the book develops a detailed analysis of the ontological structure of the existential place the place we ourselves are and concrete places the places where we are Place opens a qualified space within bounds the existence sphere an atmosphere of elemental attunement and attuned elementality Finally the book collects the dots from part one and two in a topological realist approach to Kierkegaard s theology and three main definitions of God God is love God is that everything is possible and God is the middle term The book concludes that Kierkegaard s existential topography reveals a realist position where we are is never exhausted by being the place where we are

**The Technique of Thought** Ian James, 2019-02-26 Interrogating the work of four contemporary French philosophers to rethink philosophy s relationship to science and science s relationship to reality The Technique of Thought explores the relationship between philosophy and science as articulated in the work of four contemporary French thinkers Jean Luc Nancy Fran ois Laruelle Catherine Malabou and Bernard Stiegler Situating their writings within both contemporary scientific debates and the philosophy of science Ian James elaborates a philosophical naturalism that is notably distinct from the Anglo American tradition The naturalism James proposes also diverges decisively from the ways in which continental philosophy

has previously engaged with the sciences He explores the technical procedures and discursive methods used by each of the four thinkers as distinct techniques of thought that approach scientific understanding and knowledge experimentally Moving beyond debates about the constructed nature of scientific knowledge The Technique of Thought argues for a strong variably configured and entirely novel scientific realism By bringing together post phenomenological perspectives concerning individual or collective consciousness and first person qualitative experience with science s focus on objective and third person quantitative knowledge James tracks the emergence of a new image of the sciences and of scientific practice Stripped of aspirations toward total mastery of the universe or a grand theory of everything this renewed scientific worldview along with the simultaneous reconfiguration of philosophy s relationship to science opens up new ways of interrogating immanent reality

*Hong Kong Connections* Meaghan Morris, Siu Leung Li, Stephen Ching-kiu Chan, 2005-10-01 Since the 1960s Hong Kong cinema has helped to shape one of the world s most popular cultural genres action cinema Hong Kong action films have proved popular over the decades with audiences worldwide and they have seized the imaginations of filmmakers working in many different cultural traditions and styles How do we account for this appeal which changes as it crosses national borders Hong Kong Connections brings leading film scholars together to explore the uptake of Hong Kong cinema in Japan Korea India Australia France and the US as well as its links with Taiwan Singapore and the Chinese mainland In the process this collective study examines diverse cultural contexts for action cinema s popularity and the problems involved in the transnational study of globally popular forms suggesting that in order to grasp the history of Hong Kong action cinema s influence we need to bring out the differences as well as the links that constitute

popularity     Spirit, Qi, and the Multitude Hyo-Dong Lee, 2013-11-11 We live in an increasingly global interconnected and interdependent world in which various forms of systemic imbalance in power have given birth to a growing demand for genuine pluralism and democracy As befits a world so interconnected this book presents a comparative theological and philosophical attempt to construct new underpinnings for the idea of democracy by bringing the Western concept of spirit into dialogue with the East Asian nondualistic and nonhierarchical notion of qi The book follows the historical adventures of the idea of qi through some of its Confucian and Daoist textual histories in East Asia mainly Laozi Zhu Xi Toegye Nongmun and Su un and compares them with analogous conceptualizations of the ultimate creative and spiritual power found in the intellectual constellations of Western and or Christian thought namely Whitehead s Creativity Hegel s Geist Deleuze s chaosmos and Catherine Keller s Tehom The book adds to the growing body of pneumatocentric Spirit centered panentheistic Christian theologies that emphasize God s liberating equalizing and pluralizing immanence in the cosmos Furthermore it injects into the theological and philosophical dialogue between the West and Confucian and Daoist East Asia which has heretofore been dominated by the American pragmatist and process traditions a fresh voice shaped by Hegelian postmodern and postcolonial thought This enriches the ways in which the pluralistic and democratic implications of the notion of qi may be articulated In addition by offering a valuable introduction to some representative Korean thinkers who are largely unknown to Western scholars the book advances the study of East Asia and Neo Confucianism in particular Last but not least the book provides a model of Asian contextual theology that draws on the religious and philosophical resources of East Asia to offer a vision of pluralism and democracy A reader interested in the conversation between the East and West in light of the global reality of political oppression economic exploitation and cultural marginalization will find this book informative engaging and enlightening
