Progress Note

Prepared by: Larissa L. Munson, Blue Marble Environmental

Date: January 1, 2050

These progress notes have been prepared to provide insightful updates on the advancements and developments in the field of Internal Medicine. We endeavor to create a comprehensive and accessible document while ensuring that the content remains relevant and beneficial.

The main focus of these notes is to delineate the significant progress being made in improving diagnostics, treatment strategies, and patient care associated with Internal Medicine.

Current Advances in Internal Medicine

The year 2050 ushered numerous breakthroughs in the field of Internal Medicine. New pharmacological treatments, non-invasive diagnostic tools, and patient-centric care models have significantly enhanced our ability to manage and treat various health conditions. Additionally, health informatics adoption allows for the seamless integration of patient data, thus promoting proactive care and disease prevention.

Education Patricia A. Thomas, David E. Kern, Mark T. Hughes, Sean A. Tackett, Belinda Y. Chen, 2022-08-30 A thoroughly revised and updated fourth edition of a text that has become an international standard for curriculum development in health professional education. Intended for faculty and other content experts who have an interest or responsibility as educators in their discipline, Curriculum Development for Medical Education has extended its vision to better serve a diverse professional and international audience. Building on the time honored practical and user friendly approach of the six step model of curriculum development, this edition is richly detailed with numerous examples of innovations that challenge traditional teaching models. In addition, the fourth edition presents updates in our understanding of how humans learn, a new chapter on curricula that address community needs and health equity, and an increased emphasis throughout on health systems science, population health, equity, educational technology in health professions education, and interprofessional education. This new edition remains a cutting edge tool and practical guidebook for faculty members and administrators responsible for the educational experiences of health professional students, residents, fellows, and practitioners. It includes chapters on each of the steps of curriculum development with updated examples and questions to guide the application of the timeless principles. Subsequent chapters cover curriculum maintenance and enhancement, dissemination, and curriculum development for larger programs. Appendixes present examples of full curricula designed using the six step approach, which is widely recognized as the current standard for publication and dissemination of new curricula and provides a basis for meaningful educational interventions, scholarship, and career advancement for the health professional educator. The book also provides curricular faculty development and funding resources. Contributors: Chadia N. Abrams, Belinda Y. Chen, Heidi L. Gullett, Mark T. Hughes, David E. Kern, Brenessa M. Health Crisis Management in Acute Care Hospitals Ridwan Shabsigh, 2022-03-28 In the USA, the COVID 19 crisis came as an unpleasant surprise and a shock to many healthcare systems and hospitals, especially in the crisis epicenter New York City. The Bronx was one of the hardest hit boroughs of New York City with significant negative impact of the COVID 19 pandemic on its indigent population. SBH Health System, formerly known as St Barnabas Hospital, is an integrated system of an acute care hospital, ambulatory care center, trauma center, dialysis center, stroke center, and other services and facilities serving the community of the Bronx. The story of SBH in preparing for and managing the rapidly escalating surge of severely ill patients is a treasure of lessons in health crisis preparedness and management at all levels: clinical, administrative, financial, etc. These lessons can be used for other acute care hospital settings and other potential health crises that may arise in the future. Within a short 3 weeks, SBH increased its inpatient capacity by 50%. However, during the same short time, it increased its critical care capacity by over 500%, providing critical care to severely ill patients on ventilators. This book chronicles the situation step by step and describes how this accomplishment was done. Accounts

from the frontline health workers and from the clinical and administrative leaders describe important aspects of crisis management such as team building multi departmental coordination effective communications dynamic decision making in response to rapidly changing situations keeping up the morale and caring for the healthcare workers and managing the supply chain The uniqueness of the experience of SBH is enhanced by the fact that SBH is a low budget safety net hospital serving the poorest population in New York City The worldwide trend is toward tighter healthcare budgets with demands for higher efficiency and productivity There is a lot to be learned from the SBH health crisis management including how efficient management team building management of limited resources and collaborative workplace culture make the foundation of success in the face of the crisis of the century This unique text serves as a how to guide for implementing skills necessary for crisis management Lessons from the success of SBH in tackling the dramatically fast unfolding crisis are utilized in a clear and concise manner Such lessons may benefit other health systems and hospitals in planning and preparing for similar crises
