Kdd Overcoming Massive Data Streams For Intelligence Tasks:

KDD - Overcoming Massive Data Streams for Intelligence Tasks ,2006 Actually very interesting IT systems promise to reveal connections between apparently harmless and unrelated information pieces An article from the New York Times in February 2006 makes clear that common data mining techniques were not successful in general Despite huge investments correlating data from different sources did not yield satisfactory results Transforming low level data by aggregation to meaningful events is nevertheless the key to building the basis for succeeding decisions in the context of situation reports More realistic and manageable is an approach that includes interactions with the user along with domain specific knowledge Gaining security relevant messages should be based on an iterative multi level process This process represents the core element of intelligence analysis systems which play an important role for supporting decisions in management information systems The following example illustrates the principal automated process for discovering communication structures in the context of radio reconnaissance A crucial part of this process is the analysis and visualisation of communication structures or more generally of network information This should be embedded in spatio temporal data analysis with geo oriented data access and the integration of domain specific analysis functions The intelligent analysis of radio emission data is based on data mining techniques cluster visualisations to validate the results a model based communication detection including domain specific knowledge and the visualisation of communications The following use case of a simple simplex communication clarifies the problems and the applied methods Module coupling is realised by a distributed architecture Given are a huge amount of radio emissions which are arbitrarily distributed Each emission is described by the attributes ID frequency modulation type starting time end time latitude and longitude *Artificial Intelligence, Machine Learning and User Interface Design* Abhijit Banubakode,Sunita Dhotre,Chhaya S. Gosavi,G. S. Mate,Nuzhat Faiz Shaikh,Sandhya Arora,2024-05-10 Artificial Intelligence Machine Learning and User Interface Design is a forward thinking compilation of reviews that explores the intersection of Artificial Intelligence AI Machine Learning ML and User Interface UI design The book showcases recent advancements emerging trends and the transformative impact of these technologies on digital experiences and technologies The editors have compiled 14 multidisciplinary topics contributed by over 40 experts covering foundational concepts of AI and ML and progressing through intricate discussions on recent algorithms and models Case studies and practical applications illuminate theoretical concepts providing readers with actionable insights From neural network architectures to intuitive interface prototypes the book covers the entire spectrum ensuring a holistic understanding of the interplay between these domains Use cases of AI and ML highlighted in the book include categorization and management of waste taste perception of tea bird species identification content based image retrieval natural language processing code clone detection knowledge representation tourism recommendation systems and solid waste management Advances in Artificial Intelligence Machine Learning and User Interface Design aims to inform a diverse readership including

computer science students AI and ML software engineers UI UX designers researchers and tech enthusiasts *Artificial Intelligence Paradigms for Smart Cyber-Physical Systems* Luhach, Ashish Kumar,Elçi, Atilla,2020-11-13 Cyber physical systems CPS have emerged as a unifying name for systems where cyber parts i e the computing and communication parts and physical parts are tightly integrated both in design and during operation Such systems use computations and communication deeply embedded in and interacting with human physical processes as well as augmenting existing and adding new capabilities As such CPS is an integration of computation networking and physical processes Embedded computers and networks monitor and control the physical processes with feedback loops where physical processes affect computations and vice versa The economic and societal potential of such systems is vastly greater than what has been realized and major investments are being made worldwide to develop the technology Artificial Intelligence Paradigms for Smart Cyber Physical Systems focuses on the recent advances in Artificial intelligence based approaches towards affecting secure cyber physical systems This book presents investigations on state of the art research issues applications and achievements in the field of computational intelligence paradigms for CPS Covering topics that include autonomous systems access control machine learning and intrusion detection and prevention systems this book is ideally designed for engineers industry professionals practitioners scientists managers students academicians and researchers seeking current research on artificial intelligence and cyber physical systems *Proceedings of International Conference on Advanced Communications and Machine Intelligence* Rajkumar Buyya,Sudip Misra,Yiu-Wing Leung,Ayan Mondal,2023-07-25 This book presents high quality peer reviewed papers from International Conference on Advanced Communications and Machine Intelligence MICA 2022 organised by M Kumarasamy College of Engineering Chennai Tamil Nadu India during 9 11 December 2022 The book includes all areas of advanced communications and machine intelligence The topics covered are network performance analysis data mining and warehousing parallel and distributed networks computational intelligence smart city applications big data analytics Internet of Things networks information management and wireless sensor networks The book is useful for academicians scientists researchers from industry research scholars and students working in these areas *Transparency in Social Media* Sorin Adam Matei,Martha G. Russell,Elisa Bertino,2015-07-22 The volume presents in a synergistic manner significant theoretical and practical contributions in the area of social media reputation and authorship measurement visualization and modeling The book justifies and proposes contributions to a future agenda for understanding the requirements for making social media authorship more transparent Building on work presented in a previous volume of this series Roles Trust and Reputation in Social Media Knowledge Markets this book discusses new tools applications services and algorithms that are needed for authoring content in a real time publishing world These insights may help people who interact and create content through social media better assess their potential for knowledge creation They may also assist in analyzing audience attitudes perceptions and behavior in informal social media or in formal organizational structures In

addition the volume includes several chapters that analyze the higher order ethical critical thinking and philosophical principles that may be used to ground social media authorship Together the perspectives presented in this volume help us understand how social media content is created and how its impact can be evaluated The chapters demonstrate thought leadership through new ways of constructing social media experiences and making traces of social interaction visible Transparency in Social Media aims to help researchers and practitioners design services tools or methods of analysis that encourage a more transparent process of interaction and communication on social media Knowing who has added what content and with what authority to a specific online social media project can help the user community better understand evaluate and make decisions and ultimately act on the basis of such information **Advances in Artificial Intelligence** Marie-Jean Meurs,Frank Rudzicz,2019-05-21 This book constitutes the refereed proceedings of the 32nd Canadian Conference on Artificial Intelligence Canadian AI 2019 held in Kingston ON Canada in May 2019 The 27 regular papers and 34 short papers presented together with 8 Graduate Student Symposium papers and 4 Industry Track papers were carefully reviewed and selected from 132 submissions The focus of the conference was on artificial intelligence research and advanced information and communications technology **Computation of Artificial Intelligence and Machine Learning** Amit Kumar Bairwa,Varun Tiwari,Santosh Kumar Vishwakarma,Milan Tuba,Thittaporn Ganokratanaa,2024-10-22 The two volume set CCIS 2184 2185 constitutes the refereed proceedings of the First International Conference on Computation of Artificial Intelligence and Machine Learning ICCAIML 2024 held in Jaipur India in January 18 19 2024 The 60 papers included in these volumes were carefully reviewed and selected from 645 submissions These papers focus on various subject areas within the field of Artificial Intelligence and Machine Learning such as Neural Networks and Deep Learning Natural Language Processing Computer Vision Reinforcement Learning Data Mining and Big Data Analytics AI in Healthcare and Biomedical Applications Autonomous Systems and Robotics AI Ethics and Fairness AI in Finance and Eco nomics **PC AI.** ,2000

Combating Security Challenges in the Age of Big Data Zubair Md. Fadlullah,Al-Sakib Khan Pathan,2021-05-28 This book addresses the key security challenges in the big data centric computing and network systems and discusses how to tackle them using a mix of conventional and state of the art techniques The incentive for joining big data and advanced analytics is no longer in doubt for businesses and ordinary users alike Technology giants like Google Microsoft Amazon Facebook Apple and companies like Uber Airbnb NVIDIA Expedia and so forth are continuing to explore new ways to collect and analyze big data to provide their customers with interactive services and new experiences With any discussion of big data security is not however far behind Large scale data breaches and privacy leaks at governmental and financial institutions social platforms power grids and so forth are on the rise that cost billions of dollars The book explains how the security needs and implementations are inherently different at different stages of the big data centric system namely at the point of big data sensing and collection delivery over existing networks and analytics at the data centers Thus the book sheds

light on how conventional security provisioning techniques like authentication and encryption need to scale well with all the stages of the big data centric system to effectively combat security threats and vulnerabilities The book also uncovers the state of the art technologies like deep learning and blockchain which can dramatically change the security landscape in the big data era   Big Data and Computational Intelligence in Networking Yulei Wu,Fei Hu,Geyong Min,Albert Y. Zomaya,2017-12-14 This book presents state of the art solutions to the theoretical and practical challenges stemming from the leverage of big data and its computational intelligence in supporting smart network operation management and optimization In particular the technical focus covers the comprehensive understanding of network big data efficient collection and management of network big data distributed and scalable online analytics for network big data and emerging applications of network big data for computational intelligence
