⚠ WARNING

NEVER install the keypad portion of this system where a person can reach through the gate to activate it, or where a person can touch the gate while activating the keypad. The recommended minimum distance between the gate and keypad is 10 ft.

How it Works:

A visitor without an entry code presses the CALL button on the keypad. The base (indoor) unit and the keypad will ring. A user at the base (indoor) unit answers the call by pressing the PUSH TO ANSWER/TALK button. The user at the base unit then presses the GRANT PERMISSION button to allow the visitor to operate the gate. The keypad's GRANTED light comes on, indicating that the visitor can now push any number key on the keypad to open the gate.

Visitors with access codes simply use their code to operate the gate. Temporary codes can be programmed to expire within a set number of days.
