 Heidi Wittmer, Haripriya Gundimeda, 2012-05-23 In this volume of the TEEB The Economics of Ecosystems and Biodiversity
 publication series the key concepts of the project are applied to local and regional policy and public management The aim is
 to show that by taking nature s benefits into account decision makers can promote local development to ensure human well

being and economic growth and stability while maintaining environmental sustainability The book explores the potential for local development provided by an approach based on nature It offers examples of successful implementation of this approach from across the world highlighting the importance of local decision making in management and planning It provides tools and practical guidance for reform and throughout the volume the economic benefits of environmental consideration at a local level are expounded This book is intended to offer inspiration and practical suggestions for the improvement and sustainable management of the environment and human well being The local aspect of this book complements the focus of the previous three volumes completing the set to provide a comprehensive approach to simultaneously improving and maintaining economic and environmental stability as well as human well being **Handbook of Radioactivity Analysis** Michael F.

Makers , *Transport in Human Scale Cities* Mladenović, Miloš N., Toivonen, Tuuli, Willberg, Elias, Geurs, Karst

T., 2021-08-27 This timely book calls for a paradigm shift in urban transport which remains one of the critically uncertain aspects of the sustainability transformation of our societies It argues that the potential of human scale thinking needs to be recognised both in understanding people on the move in the city and within various organisations responsible for cities **A**

Strategy for Using Multicriteria Analysis in Decision-Making Nolberto Munier, 2011-07-10 This book develops a whole strategy for decision making with the full participation of the decision maker and utilizing continuous feedback It introduces the use of the very well known and proven methodology linear programming but specially adapted for this purpose For this it incorporates a method to include subjective concepts as well as the possibility of working with many different and even contradictory objectives The book is liberally populated with diverse case studies to illustrate the concepts This practical guide will be of interest to anyone undertaking analysis and decision making on both simple and complex projects and who is looking for a strategy to organize classify and evaluate the large amount of information required to make an informed decision The strategy includes methods to analyze the results and extract conclusions from them Multicriteria Analysis

for Environmental Decision-Making Davide Geneletti, 2019-05-30 Multicriteria analysis or MCA has been increasingly used in environmental decision making to support the identification of suitable courses of action by integrating factual information with value based information collected through stakeholder engagement Multicriteria Analysis for Environmental Decision Making provides an introduction to the key concepts of MCA and includes a series of case studies that illustrate the application of MCA to a variety of environmental decision making problems ranging from protected area zoning to landfill siting and from forest restoration to environmental impact assessment of tourism infrastructures A compact reference that can be used by researchers practitioners and planners decision makers Multicriteria Analysis for Environmental Decision Making can also serve as a textbook for undergraduate and postgraduate courses in a broad range of curricula

Transforming Government and Public Services Stephen Jenner, 2016-02-24 This book distills the learning from practical experience and academic research and represents a significant contribution to the challenges we face in transforming government and public services in an environment of ever tighter finances John Suffolk UK Government Chief Information Officer Major public sector IT enabled business change programmes are designed to realize benefits in terms of more efficient services services tailored to the need of citizens and improved outcomes but in practice such benefits often fail to materialize or we are unable to demonstrate their delivery Transforming Government and Public Services provides proven tools techniques and processes to reverse this trend Stephen Jenner explores a number of key themes that are fundamental to an approach to project portfolio management built on value He explains how to develop a business case to achieve a desired intent rather than justify a particular solution create project documentation that is both technically rigorous and gives users a clear understanding of where you are going treat projects as investments rather than costs include stage gates with teeth that are closely linked to real performance plan for success rather than holding people to account for failure use a single version of the truth principle so there are no arguments about different data In a complex confusing and often highly politicized environment Stephen Jenner's Transforming Government and Public Services provides a clear definitive and highly applied guide for all involved in selecting the right projects and doing them right so that they achieve the intended investment objectives
